The New Economic Sociology Developments In An Emerging Field:

The New Economic Sociology Maruo F. Guillen, Randall Collins, Paula England, Marshall Meyer, 2002-04-25 As the American economy surged in the 1990s economic sociology made great strides as well Economists and sociologists worked across disciplinary boundaries to study the booming market as both a product and a producer of culture tracing the correlations they saw between economic and social phenomena In the process they debated the methodological issues that arose from their interdisciplinary perspectives The New Economic Sociology provides an overview of these debates and assesses the state of the burgeoning discipline The contributors summarize economic sociology s accomplishments to date identifying key theoretical problems and opportunities and formulating strategies for future research in the field The book opens with an introduction to the main debates and conceptual approaches in economic sociology Contributor Neil Fligstein suggests that the current resurgence of interest in economic sociology is due to the way it brings together many sociological subdisciplines including the study of markets households labor markets stratification networks and culture Other contributors examine the role of economic phenomena from a network perspective Ron Burt for example demonstrates how social relationships affect competitive dynamics in the marketplace A third set of chapters addresses the role of gender in economic sociology In her chapter Barbara Reskin rethinks conventional notions about discrimination and points out that the law only covers one type of discrimination while in recent years social scientists have uncovered other forms of hidden discrimination which must be addressed as well The New Economic Sociology also addresses the problem of economic development and change from a sociological perspective Alejandro Portes and Margarita Mooney elaborate on one of the key emerging concepts in economic sociology arguing that social capital as an attribute of communities and regions can contribute to economic and social well being by fostering collaboration and entrepreneurship The contributors concur that economic action must be interpreted through the cultural understandings that lend it stability and meaning By rendering these often complex debates accessible The New Economic Sociology makes a significant contribution to this still rapidly developing field and provides a useful guide for future avenues of research Re-Imagining Economic Sociology Patrik Aspers, Nigel Dodd, 2015-11-19 The purpose of this book is to explore new developments in the field of economic sociology It contains cutting edge theoretical discussions by some of the world s leading economic sociologists with chapters on topics such as the economic convention relational sociology economic identity economy and law economic networks and institutions The book is distinctive in a number of ways First it focuses on theoretical contributions by pulling together and extending what the contributors believe to be the most important theoretical innovations within their own particular areas of the field Second there are contributions by leading economic sociologists from both the US and Europe which gives the book both wider scope and appeal while also creating the opportunity for some interesting dialogue between distinct theoretical traditions The book will be of interest to researchers Ph D students and advanced students on both side of the Atlantic and

indispensable in advanced economic sociology courses

From Communists to Foreign Capitalists Nina Bandelj, 2011-10-16 From Communists to Foreign Capitalists explores the intersections of two momentous changes in the late twentieth century the fall of Communism and the rise of globalization Delving into the economic change that accompanied these shifts in central and Eastern Europe Nina Bandelj presents a

pioneering sociological treatment of the process of foreign direct investment FDI She demonstrates how both investors and hosts rely on social networks institutions politics and cultural understandings to make decisions about investment employing practical rather than rational economic strategies to deal with the true uncertainty that plagues the postsocialist environment The book explores how eleven postsocialist countries address the very idea of FDI as an integral part of their market transition The inflows of foreign capital after the collapse of Communism resulted not from the withdrawal of states from the economy as is commonly expected but rather from the active involvement of postsocialist states in institutionalizing and legitimizing FDI Using a wide array of data sources and combining a macro level account of national variation in the liberalization to foreign capital with a micro level account of FDI transactions in the decade following the collapse of Communism in 1989 the book reveals how social forces not only constrain economic transformations but also make them possible From Communists to Foreign Capitalists is a welcome addition to the growing literature on the social processes that shape economic life

The Agro-Food Chains and Networks for Development Ruerd Ruben, Maja Slingerland, Hans Nijhoff, 2006-04-06 Optimizing chain performance asks for cooperation between all agents involved in the supply chain Screening Economies Daniel Cuonz, Scott Loren, Jörg Metelmann, 2018-10-04 The relationship between economy finance and society has become opaque Quantum leaps in complexity and scale have turned this deeply interdependent web of relations into an area of incomprehensible abstraction And while the economization of life has come under widespread critique inquiry into the political potential of representational praxis is more crucial than ever This volume explores ethical aesthetic and ideological dimensions of economic representation redressing essential questions What are the roles of mass and new media How do the arts contribute to critical discourse on the global techno economic complex Collectively the contributions bring theoretical debate and artistic intervention into a rich exchange that includes but also exceeds the conventions of academic scholarship
