Meaning of the Senses Paul Eisewicht, Ronald Hitzler, Lisa Schäfer, 2023-08-21 That which we consider to be real we call knowledge As a rule we consider what our five senses convey to us to be real Our perception and what we consider real and construct as socially effective differs depending on which senses we focus on and how intensively The connection between reality constructions and sensory conditions has received little attention in social research so far This concerns for example the use of our sensory organs for empirical reconstructions of bodies of knowledge sensory perceptions as part of bodies of knowledge or the question of how far knowledge is dependent on sensory abilities This anthology attempts to close this gap by focusing on the social significance of sensory perceptions and discussing it using the example of various objects of investigation This book is a translation of an original German edition The translation was done with the help of artificial intelligence machine translation by the service DeepL com A subsequent human revision was done primarily in terms of content so that the book will read stylistically differently from a conventional translation *Berlin Sports* Heather L
