[The Mindful Interview Method](#) Gil Zamora,2023-07-19 The Mindful Interview Method Retrieving Cognitive Evidence provides

investigators with a proven methodology to gather authentic reliable information from eyewitnesses to help identify potential suspects The book offers police and non law enforcement readers step by step techniques to improve gathering reliable evidence through a mindful interview process The author also provides an assessment component that can measure the reliability of previous interviews performed and further help to improve the interview process the skills of the investigator and thus the reliability of cognitive evidence gathered from future interviews It is notable that there is minimal to no instruction or training currently offered to those individuals most often tasked with interviewing an eyewitness about a crime as part of criminal investigations Despite the lack of training and certification we allow interviewers to conduct questioning in the face of well established research as to the malleability of human memory The assumption is that officials trained in the rules of evidence will innately ask the right questions and in the proper manner without the proper understanding of the fragility of human memory or the proper training That assumption is false and the reality is quite the opposite In fact we learn of cases commonplace in the media that frequently involve questionable interview tactics misidentifications and wrongful convictions of innocent people The Mindful Interview Method uses cognitive research to inform the methods and principles for a mindful approach to gathering only the information the subject remembers This is the best way to use evidence based lines of questioning to perform interviews that elicit the most reliable accounts and information for investigative purposes Considering current reforms on best practices throughout the criminal justice system the book provides a path forward for professional interviewers to adopt interview methodologies that guide the practitioner to question anyone in a mindful manner
