Skilled Labour Supply Imbalances William Dodge,1977 Report and recommendations concerning labour market imbalance in the labour supply of skilled workers in Canada discusses management attitudes and trade union attitudes toward human resources planning with particular reference to labour mobility immigration educational policy short term and medium term forecasting programmes etc Graph and statistical tables **In-Depth Productivity Review of Belgium**

OECD,2019-07-08 Belgium has a high level of productivity However growth of productivity has declined quite strongly over the past two decades and more so than in other advanced economies This is a worrying development as fewer productivity gains mean less wage growth and a slowdown in improvements to pensions health care and well being This In Depth Productivity Review of Belgium assesses in detail the drivers of productivity and recommends a 7 Point Action Plan to reignite productivity growth in Belgium **The Political Economy of Labour Market Institutions** Gilles

Saint-Paul,2000-09-28 According to most orthodox economists labour market rigidities are the key culprit for such high unemployment as has been observed in Europe during the past three decades But governments that have attempted to follow the standard prescription of removing rigidities have often faced harsh political opposition This book looks at why labour market institutions such as employment protection unemployment benefits and relative wage rigidities exist what role they play in society why they seem so persistent where the pressure to reform them comes from and whether reform can be politically viable or not The book ascribes a central role to the existence of underlying microeconomic frictions and to redistributive pressures between rich and poor and shows how these ingredients may give rise to labour market rents which in turn explain why a coherent set of rigidities arise as the outcome of the political process It is also shown that at the same time such rents create resistance to reform and contribute to locking society into a high unemployment rigid equilibrium Finally the basic principles exposed in the book are used to discuss various strategies for a successful labour market reform

Economic Surveys: Thailand 2020 Economic Assessment OECD,2020-10-05 Thailand has made impressive economic and social progress over several decades However the COVID 19 crisis has interrupted this progress Thanks to its sound macroeconomic policy framework Thailand was well placed to respond rapidly to the sharp economic downturn Nevertheless achieving high income country status will require in addition to a strong recovery programme a set of policy reforms focused on productivity growth and human capital accumulation Thailand has made remarkable progress in expanding access to education and the share of highly educated workers has increased significantly Nevertheless because of skills mismatches substantial labour shortages have prevailed in a range of occupations and industries which makes it important to improve vocational education and adult training programmes As the demand for services has become important globally Thailand has an opportunity to boost its exports of services diversify its economic activity and therefore become more resilient in the face of unexpected shocks This would involve a focus on digital services and business to business services which represent a large share of the value of manufacturing products Focus on human capital skills digital technology and high value services would help Thailand resume strong economic growth and social progress after the COVID 19 crisis **SPECIAL FEATURES HUMAN CAPITAL TRADE IN SERVICES Skills forecasting in the South Mediterranean region** UNESCO,2021-09-30

Power, Norms, and Inflation Michael R. Smith,2017-09-29 Explanations for inflation had for a long time been ceded to the purview of economists The acceleration in rates of inflation within advanced economies during the 1960s and 1970s however prompted sociologists and political scientists to attempt their own accounts for this phenomenon There are two major competing explanations of the postwar inflation One most commonly held by economists is that inflation has been produced by governments through a combination of policy errors and cynical manipulation of policy for electoral purposes The other often advanced by sociologists and political scientists as an alternative is that inflation has been an outcome of class conflict In his study that ranges widely over the literature in the relevant disciplines Smith examines the strengths and weaknesses of each account with particular attention to the evidence presented in support of class conflict explanations He concludes that on balance the policy error cynical manipulation explanation is better supported than its class conflict rival The clarity with which Smith presents these rival accounts and the critical rigor of his scrutiny make this a work of interest to advanced students in macroeconomic theory and to policy makers *Sustainable and Dynamic Graduate Employability* Mona
