**Maya Calendar Origins** Prudence M. Rice, 2009-02-17 In *Maya Political Science Time Astronomy and the Cosmos* Prudence M. Rice proposed a new model of Maya political organization in which geopolitical seats of power rotated according to a 256 year calendar cycle known as the May This fundamental connection between timekeeping and Maya political organization sparked Rice's interest in the origins of the two major calendars used by the ancient lowland Maya one 260 days long and the other having 365 days In *Maya Calendar Origins* she presents a provocative new thesis about the origins and development of the calendrical system Integrating data from anthropology archaeology art history astronomy ethnohistory myth and linguistics Rice argues that the Maya calendars developed about a millennium earlier than commonly thought around 1200 BC as an outgrowth of observations of the natural phenomena that scheduled the movements of late Archaic hunter gatherer collectors throughout what became Mesoamerica She asserts that an understanding of the cycles of weather and celestial movements became the basis of power for early rulers who could thereby claim control over supernatural cosmic forces Rice shows how time became materialized transformed into status objects such as monuments that encoded calendrical or temporal concerns as well as politicized becoming the foundation for societal order political legitimization and wealth Rice's research also sheds new light on the origins of the Popol Vuh which Rice believes encodes the history of the development of the Mesoamerican calendars She also explores the connections between the Maya and early Olmec and Izapan cultures in the Isthmian region who shared with the Maya the cosmovision and ideology incorporated into the calendrical systems

Rice, 2019-04-14 Anthropomorphizing the Cosmos explores the sociocultural significance of more than three hundred Middle Preclassic Maya figurines uncovered at the site of Nixtun Ch'ich on Lake Pet'itx in northern Guatemala In this careful

holistic and detailed analysis of the Petén lakes figurines hand modeled terracotta anthropomorphic fragments animal figures and musical instruments such as whistles and ocarinas Prudence M Rice engages with a broad swath of theory and comparative data on Maya ritual practice Presenting original data Anthropomorphizing the Cosmos offers insight into the synchronous appearance of fired clay figurines with the emergence of societal complexity in and beyond Mesoamerica Rice situates these Preclassic Maya figurines in the broader context of Mesoamerican human figural representation identifies possible connections between anthropomorphic figurine heads and the origins of calendrics and other writing in Mesoamerica and examines the role of anthropomorphic figurines and zoomorphic musical instruments in Preclassic Maya ritual The volume shows how community rituals involving the figurines helped to mitigate the uncertainties of societal transitions including the beginnings of settled agricultural life the emergence of social differentiation and inequalities and the centralization of political power and decision making in the Petén lowlands Literature on Maya ritual cosmology and specialized artifacts has traditionally focused on the Classic period with little research centering on the very beginnings of Maya sociopolitical organization and ideological beliefs in the Middle Preclassic Anthropomorphizing the Cosmos is a welcome contribution to the understanding of the earliest Maya and will be significant to Mayanists and Mesoamericanists as well as nonspecialists with interest in these early figurines
