Green, 2001-06-28 Research on the early human embryo has long been recognized as essential to progress in a host of biomedical areas from reproductive medicine to the treatment of pediatric cancers Now with the possibility of stem cell research and cell replacement therapies embryo research holds out the promise of cures for many serious disease conditions such as diabetes and Alzheimer's disease Despite its importance however human embryo research has met powerful opposition Drawing on his experience as a member of the NIH's Human Embryo Research Panel Green offers a first hand account of the embryo research debates In telling this story he periodically pauses to reflect on some of the leading philosophical challenges posed by embryo research and new interventions at the start of life Among the questions he examines are What is the impact of new biological information on our thinking about life's beginning May parents risk injuring a child in order to have it What role should religion play in shaping biomedical policy in a controversial area like this This is a fascinating insider's account of one of the most important if unsuccessful recent efforts to come to terms with a controversial area of scientific research **Springer-Verlag: History of a Scientific Publishing House** Heinz Sarkowski, Heinz Götze, 1996-10-07 A chronicle written only by someone for whom the present important Goethe Maximen und Reflexionen The second volume of our company's history differs from the first in several ways With a great appreciation of history Heinz Sarkowski has impressively reconstructed the company correspondence which is fortunately almost completely preserved and made it speak There is an inexhaustible amount of correspondence pertaining to the period I have taken it upon myself to cover and working through it properly not only would have required many years but also would have detracted from the immediacy of the account Thus I decided to proceed from personal experience to describe what has

happened and to provide details gleaned from the correspondence I have counted here by no means only my own but rather the personal experiences of the many company members and employees who are mentioned below With the founding of the New York firm developments branch out becoming parallel but separate and the change from one scene to another repeatedly interrupts the continuing course of events and the chronological flow of the report In this connection the occasional repetition of certain facts was avoidable In some places however it seemed more appropriate not to interrupt particular lines of development but to describe them in continuity without regard to specific periods of time

Assessment of Mammalian Embryo Quality A. van Soom, M. Boerjan, 2012-12-06 Thanks to enormous scientific efforts of the last decades in vitro fertilization IVF and in vitro production IVP have now been introduced successfully in the practice of human infertility treatment and cattle breeding programs This comprehensive book allows us to bridge the knowledge from both biomedical and veterinary fields of research For the first time studies concerning the human embryo as well as embryos from domestic species are brought together The central theme of the book is the assessment of mammalian embryo quality In 15 chapters written by well known scientists different aspects of the assessment of mammalian embryo quality are summarized Non invasive and invasive techniques to evaluate embryo quality are separated in two parts In addition the book is provided with appendices on practical aspects and thus the book should be present in each laboratory for IVF and IVP
