Lifetime's Non-Ordinary Events Richard F. Ward,2015-06-05 In about the year 1980 I began recording the non ordinary events people met and places visited in my life Eventually I looked back into my past life to recount past events people and places which came to mind for the earlier years As subsequent years rolled by I had assembled a list of 172 items which I consider unusual or non ordinary in my lifetime My next step in the evolution of this work was to elaborate on each of the parts to expand on each of the one or two line statements When assembled it dawned on me that it provided an autobiography albeit different from a usual biography of my life Hopefully the treatment will render the human story more entertaining to the average reader Having reached the middle of my octogenarian decade perhaps a better perspective can thus be obtained The reader s entertainment is the effect I wish to impart If this should ensue the effort shall not have been merely self aggrandizement *Investigation of Reliability Aspects of Power Semiconductors in Photovoltaic Central Inverters for Sunbelt Regions* Christian Felgemacher,2018-03-23 High reliability and system lifetimes in the range of 30 years are essential for renewable energy systems such as photovoltaic power plants to minimise costs for the generated electric energy At the same time such systems are used in regions with high solar irradiance and also harsh environmental conditions Therefore designs for photovoltaic inverters need to meet not only the key design criteria of high conversion efficiency but also need to be very robust and at the same time meet challenging cost targets In this dissertation aspects concerning the lifetime and reliability of power semiconductors in photovoltaic central inverters are investigated On key topic of the dissertation is the measurement of the voltage dependent failure rate due to cosmic radiation induced single event burnout of SiC and Si power semiconductors The second topic is the development of a system level simulation to quantify the stress on the power semiconductors in a PV central inverters in various regions of the world Further topics are the investigation of improved control concepts for the cooling system of PV central inverters and the monitoring of IGBT temperatures during converter operation
