Swissair Down Don Ledger, 2000 Every disaster has its own cause and its own effects Undoubtedly the effects of the September 1998 crash of Swissair Flight 111 into the unforgiving waters off Peggys Cove Nova Scotia killing all 229 people on board has had tremendous personal consequences The purpose of this book though is to reach back to events leading up to the crash in order to discover what caused the worst disaster in Canada s aviation history to find out why in 16 terrifying minutes a state of the art jetliner lost all navigational aids and why when only minutes away from Halifax International Airport it turned back out to sea There were no survivors of Swissair 111 to describe what happened and almost nothing larger than hand sized pieces from which to reconstruct the accident But author and pilot Don Ledger carefully re creates what took place in the cockpit of the stricken airliner describing each link in a disastrous chain of events With clarity depth and respect for all those involved Swissair Down takes us from the pilot s first distress call to the moment 16 minutes later when the aircraft hit the sea and exploded from recovery efforts aboard local fishing boats to a high tech military search and from the shocking complacency of the airline industry to our future safety as passengers The Washington Post Index, 1999
