develop the relationship between culture and manifold phenomena of creativity innovation and entrepreneurship in order to  
promote further and better understanding how why and when these phenomena are manifested themselves across different  
cultures Currently cross cultural research is one of the most dynamically and rapidly growing areas At the same time  
creativity inventiveness innovation and entrepreneurship are championed in the literature as the critical element that is vital  
not just for companies but also for the development of societies A sizable body of research demonstrates that cultural  
differences may foster or inhibit creative inventive innovative and entrepreneurial activities and each culture has its own  
strengths and weaknesses in these regards Better understanding of cultural diversity in these phenomena can help to build  
on strengths and overcome weaknesses Cross cultural studies in this field represent a comparatively new class of  
interdisciplinary research This is a field where cultural sociological psychological historical economic management  
technology and business studies closely intersect In this book a global team of researchers representing Europe Asia and the
