Symbol And Interpretation:

Symbolism and Interpretation Tzvetan Todorov, 1986 In *Symbolism and Interpretation* Tzvetan Todorov examines two aspects of discourse its production which has traditionally been the domain of rhetoric and its reception which has always been the object of hermeneutics He analyzes the diverse theories of symbolism and interpretation that have been elaborated over the centuries and considers their contribution to a general theory of verbal symbolism discussing a wide range of thinkers from the Sanskrit philosophers and Aristotle to the German Romantics and contemporary semioticians Todorov begins by examining general ideas of linguistic symbolism and the interpretive process He then turns to a detailed consideration of two of the most influential and pervasive interpretative strategies in Western thought the patristic exegesis of Augustine and Aquinas and the philological exegesis foreshadowed in the work of Spinoza developed by Wolf Ast Boeckh and Lanson and criticized by Schleiermacher Todorov clarifies in masterly fashion the intricacies of the many schools of thought and refines the concepts crucial to critical theory today including the distinctions between language and discourse direct and indirect meaning sign and symbol Ably translated by Catherine Porter *Symbolism and Interpretation* provides a coherent and innovative framework that is indispensable to the study of semiotics its history and its future

Symbol and Interpretation David M. Rasmussen, 1974 For the past four or five years much of my thinking has centered up on the relationship of symbolic forms to philosophic imagination and interpretation As one whose own philosophic speculations began at the end of a cultural epoch under methodologies dominated either by neo Kantianism or schools of logical empiricism the symbol as a product of a cultural imagination has been diminished it has been necessary for those who wanted to preserve the symbol to find appropriate philosophical methodologies to do so In the following chapters we shall attempt to show through a consideration of a series of recent interpretations of the symbol as well as through constructive argument that the symbol ought to be considered as a linguistic form in the sense that it constitutes a special language with its own rubrics and properties There are two special considerations to be taken account of in this argument first the definition of the symbol and second the interpretation of the symbol Although we shall refrain from defining the symbol explicitly at this point let it suffice to state that our definition of the symbol is more aesthetic than logical in the technical sense of formal logic more cultural than individual more imaginative than scientific The symbol in our view is somewhere at the center of culture the well spring which testifies to the human imagination in its poetic psychic religious social and political forms
