

# SYMBOLIC INTERACTIONISM

The symbolic interaction theory states that the meaning we ascribe to objects, processes, ideas, concepts, and systems are subjective.

## EXAMPLE

As a simple example of symbolic interactionism, the word "dog" might evoke a fuzzy, heart-warming emotion in someone who has had mostly friendly experiences with dogs. But another person, who may have been bitten or attacked by dogs, may feel fear and revulsion. The meaning ascribed to the concept of "dog" is different depending on your context.

## EXPLANATION

**Symbol** – Something that represents an object, emotion, process, etc, in the real world. E.g. the word "dog" is a symbol for a four-legged domesticated canine, and "cow" is a symbol for a four-legged bovine.

**Interaction** – How the meaning of a symbol is interpreted and modified through social interaction. The Hindu villager and the American Christian may lead them to invest the word "cow" with different meanings.

## **Symbolic Meaning The:**

**The Symbolic Meaning** David Herbert Lawrence, 1962 In effect a new work by D H Lawrence and perhaps the best of his literary criticism The Symbolic Meaning is a volume which he wrote and intended to publish as early as 1917 before he had ever visited the United States He then called it The Transcendental Element in American Literature and some of its brilliant unorthodox critiques of leading American literary figures were printed as a series in the English Review They attracted little attention at that time the series was not completed and the book did not appear In 1923 when Lawrence came to America he rewrote the series completely He wrote now in the white heat of anger his sympathy toward America having turned to hatred the tone and temper of the essays were changed into an almost polemical violence The new and shorter versions were published as Studies in Classic American Literature which Edmund Wilson has called one of the few first rate books that have ever been written on the subject and it is in this form that they are known and widely read today It will be for today s critics and readers to decide which version best represents Lawrence and does most justice to his twelve American subjects Poe Whitman Melville Hawthorne Cooper and the rest Students of Lawrence will find the comparison fascinating many will surely prefer these sober thoroughgoing and well tempered earlier judgments Dust jacket

**Schelling's Theory of Symbolic Language** Daniel Whistler, 2013-03-28 This study reconstructs F W J Schelling s philosophy of language based on a detailed reading of 73 of Schelling s lectures on the Philosophy of Art Daniel Whistler argues that the concept of the symbol present in this lecture course and elsewhere in Schelling s writings of the period provides the key for a non referential conception of language where what matters is the intensity at which identity is produced Such a reconstruction leads Whistler to a detailed analysis of Schelling s system of identity his grand project of the years 1801 to 1805 which has been continually neglected by contemporary scholarship In particular Whistler recovers the concepts of quantitative differentiation and construction as central to Schelling s project of the period This reconstruction also leads to an original reading of the origins of the concept of the symbol in German thought there is not one romantic symbol but a whole plethora of experiments in theorising symbolism taking place at the turn of the nineteenth century At stake then is Schelling as a philosopher of language Schelling as a systematiser of identity and Schelling as a theorist of the symbol

**The Lautsi Papers: Multidisciplinary Reflections on Religious Symbols in the Public School Classroom** Jeroen Temperman, 2012-09-06 Increasingly debates about religious symbols in the public space are reformulated as human rights questions and put before national and international judges Particularly in the area of education legitimate interests are manifold and often collide Children s educational and religious rights parental liberties vis vis their children religious traditions state obligations in the area of public school education the state neutrality principle and the professional rights and duties of teachers are all

principles that may warrant priority attention Each from their own discipline and perspective ranging from legal human rights scholars legal philosophers political scientists comparative law scholars and country specific legal experts these experts contribute to the question of whether in the present day pluralist state there is room for state symbolism e g crucifixes in classroom or personal religious signs e g cross necklaces or kirpans or attire e g kippahs or headscarves in the public school classroom      *The Symbolism of Freemasonry* Albert Gallatin Mackey,1869      **Cycles of Time and Meaning in the Mexican Books of Fate** Elizabeth Hill Boone,2007-02-01 In communities throughout precontact Mesoamerica calendar priests and diviners relied on pictographic almanacs to predict the fate of newborns to guide people in choosing marriage partners and auspicious wedding dates to know when to plant and harvest crops and to be successful in many of life's activities As the Spanish colonized Mesoamerica in the sixteenth century they made a determined effort to destroy these books in which the Aztec and neighboring peoples recorded their understanding of the invisible world of the sacred calendar and the cosmic forces and supernaturals that adhered to time Today only a few of these divinatory codices survive Visually complex esoteric and strikingly beautiful painted books such as the famous Codex Borgia and Codex Borbonicus still serve as portals into the ancient Mexican calendrical systems and the cycles of time and meaning they encode In this comprehensive study Elizabeth Hill Boone analyzes the entire extant corpus of Mexican divinatory codices and offers a masterful explanation of the genre as a whole She introduces the sacred divinatory calendar and the calendar priests and diviners who owned and used the books Boone then explains the graphic vocabulary of the calendar and its prophetic forces and describes the organizing principles that structure the codices She shows how they form almanacs that either offer general purpose guidance or focus topically on specific aspects of life such as birth marriage agriculture and rain travel and the forces of the planet Venus Boone also tackles two major areas of controversy the great narrative passage in the Codex Borgia which she freshly interprets as a cosmic narrative of creation and the disputed origins of the codices which she argues grew out of a single religious and divinatory system      **Interpreting New Testament Narratives** Eric J. Douglass,2018-10-02 Narratives are the concrete manifestation of an author's subjectivity They function as that person's voice and should be treated with the same respect that is granted to all voices In *Interpreting New Testament Narratives* Eric Douglass develops this ethical perspective so that narratives are treated as communication and the author's voice is regarded as a valued perspective Employing a cross disciplinary approach Douglass shows how readers engage narratives as mental simulations creating a temporary possible world that readers enter and experience To recover communication readers locate the events of this world in the culture of the intended audience and translate this meaning into the modern reader's worldview Using a staged reading design this initial reading is followed by readings of critique      *Rethinking Symbolism* Dan Sperber,1975-09-25 The main thrust of this book is to deliver a major critique of materialist and rationalist explanations of social and cultural forms but in the process Sahlins has given us a much stronger statement of the centrality of symbols in human affairs than have

many of our practicing symbolic anthropologists He demonstrates that symbols enter all phases of social life those which we tend to regard as strictly pragmatic or based on concerns with material need or advantage as well as those which we tend to view as purely symbolic such as ideology ritual myth moral codes and the like Robert McKinley Reviews in Anthropology

Liturgical Semiotics from Below Kevin O. Olds, 2023-12-13 How do we find meaning in worship How might we worship more meaningfully These questions invite us into a field of study called liturgical semiotics This book takes a deep dive into this arena using the metaphor of breathing as a vehicle for the journey It is about getting back to what is at the core of the Christian identity namely worship and exploring how to find and make meaning in it In doing so we will find out not only more about our worship but about ourselves Liturgical semiotics is not only about the liturgical event but about the semiotician as well Along the way using BREATHE GASP and RASP as guides we will read the signs of our worship connect the dots of the stories it tells and uncover new meanings We will also find ways to make our worship more evocative and more resonant with the current culture Take a deep breath and dive in

**The Roman Self in Late Antiquity** Marc Mastrangelo, 2008-01-21 The Roman Self in Late Antiquity for the first time situates Prudentius within a broad intellectual political and literary context of fourth century Rome As Marc Mastrangelo convincingly demonstrates the late fourth century poet drew on both pagan and Christian intellectual

traditions especially Platonism Vergilian epic poetics and biblical exegesis to define a new vision of the self for the newly Christian Roman Empire Mastrangelo proposes an original theory of Prudentius's allegorical poetry and establishes Prudentius as a successor to Vergil Employing recent approaches to typology and biblical exegesis as well as the most current theories of allusion and intertextuality in Latin poetry he interprets the meaning and influence of Prudentius's work and positions the poet as a vital author for the transmission of the classical tradition to the early modern period This provocative study challenges the view that poetry in the fourth century played a subordinate role to patristic prose in forging Christian Roman identity It seeks to restore poetry to its rightful place as a crucial source for interpreting the rich cultural and intellectual life of the era

*Symbolic Landscapes* Gary Backhaus,John Murungi,2008-11-09 Symbolic Landscapes presents a definitive collection of landscape place studies that explores symbolic cultural levels of geographical meanings Essays written by philosophers geographers architects social scientists art historians and literati bring specific modes of expertise and perspectives to this transdisciplinary and interdisciplinary study of the symbolic level human existential spatiality Placing emphasis on the pre cognitive genesis of symbolic meaning as well as embodied experiential lived geography the volume offers a fresh quasi phenomenological approach The editors articulate the epistemological doctrine that perception and imagination form a continuum in which both are always implicated as complements This approach makes a case for the interrelation of the geography of perception and the geography of imagination which means that human cultural geography offers only an abstraction if indeed an aesthetic geography is constituted merely as a sub field Human cultural geography can only approach spatial reality through recognizing the intimate interrelative dialectic between the imaginative and perceptual

meanings of our landscapes place worlds This volume reinvigorates the importance of the topic of symbolism in human cultural geography landscape studies philosophy of place architecture and planning and will stand among the classics in the field

*Alternative Sociologies of Religion* James V. Spickard, 2017-03-14

Uncovers what the sociology of religion would look like had it emerged in a Confucian Muslim or Native American culture rather than in a Christian one Sociology has long used Western Christianity as a model for all religious life As a result the field has tended to highlight aspects of religion that Christians find important such as religious beliefs and formal organizations while paying less attention to other elements Rather than simply criticizing such limitations James V Spickard imagines what the sociology of religion would look like had it arisen in three non Western societies What aspects of religion would scholars see more clearly if they had been raised in Confucian China What could they learn about religion from Ibn Khaldun the famed 14th century Arab scholar What would they better understand had they been born Navajo whose traditional religion certainly does not revolve around beliefs and organizations Through these thought experiments Spickard shows how non Western ideas understand some aspects of religions even of Western religions better than does standard sociology The volume shows how non Western frameworks can shed new light on several different dimensions of religious life including the question of who maintains religious communities the relationships between religion and ethnicity as sources of social ties and the role of embodied experience in religious rituals These approaches reveal central aspects of contemporary religions that the dominant way of doing sociology fails to notice Each approach also provides investigators with new theoretical resources to guide them deeper into their subjects The volume makes a compelling case for adopting a global perspective in the social sciences

*The Rationality of Feeling* David Best, 2011

This volume emphasizes the necessity for arts teachers to nurture the personal development of their students by expanding their artistic understanding and creativity In aiming to provide a broader understanding for the effective teaching of the arts the author provides powerful reasons for seeing the arts as agents of learning understanding and development The volume also demonstrates that whilst the arts are centrally concerned with feeling they are as fully open to objective reasoning as any other subject discipline such as science but the dichotomy between scientism and subjectivism is all pervading in a curriculum which marginalises the teaching of the arts
