**Symbolization and Its Discontents** Kate S. Fodaski, 2004 [Literary Theory and Criticism](#) Patricia Waugh, 2006 This volume offers a comprehensive account of modern literary criticism presenting the field as part of an ongoing historical and intellectual tradition. Featuring thirty-nine specially commissioned chapters from an international team of esteemed contributors, it fills a large gap in the market by combining the accessibility of single-authored selections with a wide range of critical perspectives. The volume is divided into four parts. Part Three offers introductory overviews of the most important movements and thinkers in modern literary theory, and Part Four looks at emergent trends and future directions.

**Symbols that Bind, Symbols that Divide** Scott L. Moeschberger, Rebekah A. Phillips DeZalia, 2014-05-14 This work explores the function of both divisive and uniting symbols in various conflict settings around the world. It takes a fairly broad perspective on what constitutes a symbol to include objects such as flags, signs, language and monuments, all of which convey conflicting meanings in a society affected by conflict. In addition, the authors include commemorations and other dynamic events that serve as a means for groups or individuals to connect with past generations, celebrate a heritage and possibly express religiosity. In order to provide context for the nuances surrounding the symbols, there are brief historical overviews for each conflict featured in the volume. In each chapter, three issues are emphasized: the particular symbols that are divisive in the specific culture; how these symbols were used to perpetuate conflict; and how these symbols can be used or modified to bring unification. Contributions come from authors from around the world that have conducted empirical studies on intergroup relationships or have provided significant academic contributions in the area of symbols and collective memories represented in theoretical publications. Taken together, the contents of the volume provide a rich tapestry of intellectual analyses to the diverse selection of conflict settings from around the globe. In addition to the nine case studies, there is an introductory chapter which grounds the discussion in current peace psychology literature as well as provides future directions. This volume is a valuable resource to many as the focus on symbols can span many disciplines such as political science, anthropology, sociology, psychology and art. Furthermore, it is of significant interest to all scholars and peace activists studying these various countries and their conflicts.

**Alexandre Dumas as a French Symbol since 1870** Eric Martone, 2020-03-17 Nineteenth-century writer Alexandre Dumas (1802-1870), author of *The Three Musketeers* and *The Count of Monte Cristo*, has been a controversial part of the French patrimony and faced various forms of racial prejudice in France because of his biracial ancestry and due to being a

descendant of a slave During the late nineteenth century the rise of scientific racism and aggressive European imperialism resulted in worldviews supporting European superiority and equated European with being white Such developments complicated perceptions of Dumas as part of the French patrimony French intellectuals and politicians from the late nineteenth century onward created their own imaginative visions of what Dumas had represented in order to employ them ideologically to support or counter prevailing mainstream views of French history and identity This collection traces the evolution of Dumas's legacy as a controversial symbol of France since 1870 as the nation has struggled to deal with colonialism and its aftermath and increased diversity and globalization

### **Art of Darkness**

Anne Williams, 2009-02-15 *Art of Darkness* is an ambitious attempt to describe the principles governing Gothic literature Ranging across five centuries of fiction drama and

verse including tales as diverse as Horace Walpole's *The Castle of Otranto*, Shelley's *Frankenstein*, Coleridge's *The Rime of the Ancient Mariner* and Freud's *The Mysteries of Enlightenment*. Anne Williams proposes three new premises that Gothic is poetic not novelistic in nature that there are two parallel Gothic traditions Male and Female and that the Gothic and the Romantic represent a single literary tradition. Building on the psychoanalytic and feminist theory of Julia Kristeva, Williams argues that Gothic conventions such as the haunted castle and the family curse signify the fall of the patriarchal family. Gothic is therefore poetic in Kristeva's sense because it reveals those others most often identified with the female. Williams identifies distinct Male and Female Gothic traditions. In the Male plot the protagonist faces a cruel violent and supernatural world without hope of salvation. The Female plot by contrast asserts the power of the mind to comprehend a world which though mysterious is ultimately sensible. By showing how Coleridge and Keats used both Male and Female Gothic, Williams challenges accepted notions about gender and authorship among the Romantics. Lucidly and gracefully written, *Art of Darkness* alters our understanding of the Gothic tradition of Romanticism and of the relations between gender and genre in literary history.

*Mind, Meaning and Mental Disorder*, 2004-03-25      Word Meaning and Syntax Stephen Wechsler, 2015-03-20. This book examines the nature of the interface between word meaning and syntax, one of the most controversial and elusive issues in contemporary linguistics. It approaches the interface from both sides of the relation and surveys a range of views on the mapping between them with an emphasis on lexical approaches to argument structure. Stephen Wechsler begins by analysing the fundamental problem of word meaning with discussions of vagueness and polysemy, complemented with a look at the roles of world knowledge and normative aspects of word meaning. He then surveys the argument taking properties of verbs and other predicators and presents key theories of lexical semantic structure. Later chapters provide a description of formal theories and frameworks for capturing the mapping from word meaning to syntactic structure as well as arguments in favour of a lexicalist approach to argument structure. The book will interest scholars of theoretical linguistics particularly in the fields of syntax and lexical semantics as well as those interested in psycholinguistics and philosophy of language.

*Meaning and Authenticity* Cesar Grana,2023-03-31 This outstanding collection of hitherto unpublished work written over the last fifteen years of the author s life reveals the development and maturation of

his ideas about sociology and art and specifically about the relationship between them Grafia sees in the artistic traditions of Western society the sociological sources of our sense of cultural form as well as cultural and intellectual meaning He discusses theories of art and theories of artists as they have changed over time although the book is neither a history of art nor a criticism of specific artistic works Rather it is a defense of the sociology of art Grafia believes that the difficult and ambitious questions in the sociology of art are not merely questions of the proper role or status of the artist or the recognition of art as an ornament perhaps the supreme ornament of our culture He believes that what the sociologist must come to terms with is the view of art as the representation indeed the revelation of what is most telling and pervasive in culture itself This perspective assumes that the most serious claims made for art are in fact inseparable from the unique claims that are made about art Art can make visible what is implicit in our lives Art can put before us a statement of what we are but do not always recognize in ourselves Art is the mask and mimicry through which society gestures to us its ultimate and most poignant meanings Grafia contends that this vision of art derives from Hegelian aesthetics and he believes that this grand view whether one takes an idealist a literary or a Marxist materialist position also implies a dramatically changed conception of society itself The essays cover a variety of subjects from Marx museums and modern literature to Durkheim Daniel Bell and bullfighting the last being the apotheosis of cultural expression rendered into artistic form Throughout Grafia considers questions of the social origins of our artistic and intellectual traditions the influence of these traditions on our ways of thinking about society and their pervasiveness as standards for social meaning
