Symptom Analysis:

Symptom Analysis and Physical Diagnosis in Medicine Alan Edward Davis, Terry Dorcen Bolin, Noel Maurice Wilton, 1977 **Cancer Symptom Science** Charles S. Cleeland, Michael J. Fisch, Adrian J. Dunn, 2010-11-18 Cancer Symptom Science is the first interdisciplinary compilation of research on the mechanisms underlying the expression of cancer related symptoms. It presents innovations in clinical animal and in vitro research, research methods in brain imaging and statistical descriptive approaches to understanding the mechanistic basis of symptom expression. This volume also provides perspectives from patients, government and industry. By collecting and synthesizing the developing threads of new approaches to understanding cancer related symptoms, the book promotes a pioneering framework for merging behavioral and biological disciplines to clarify mechanisms of symptom evolution, incorporating new technologies, testing novel agents for symptom control and improving patient functioning and quality of life both during and after cancer treatment. With an expert editorial team led by Charles S. Cleeland, an internationally recognized leader in cancer pain assessment and treatment, this is essential reading for surgical, clinical and medical oncologists, academic researchers and pharmaceutical companies developing new agents to control symptom expression. The Psychoanalysis of Symptoms Henry Kellerman, 2008 In this book Dr Henry Kellerman presents a set of principles, psychological psychoanalytic axioms which underpin the curing of psychological/emotional symptoms through the use of four terms that comprise a psychological equation. Each of these terms is spelled out and then throughout the book specific symptoms are identified and in a step by step display the reader can follow the cure of the symptom through the use of this new discovery.
