**Synergic Power** James Harvey Craig, Marguerite Craig, 1979-06      **Synergic Power Beyond Domination and Permissiveness** James Harvey Craig, Marguerite Craig, 1974      *The Quality of Life: Systems Approaches* G.E.

Lasker, 2014-05-20 Applied Systems and Cybernetics covers the proceedings of the International Congress on Applied Systems Research and Cybernetics. The book presents several studies that cover the application of systems research and cybernetics in improving the quality of life. Majority of the materials in the text tackle various aspects of quality of life in relation to systems and cybernetics such as living space, future prospects, work, education, politics, law, ethics, and values, culture, and ethnicity and social systems. The selection also presents articles that cover the elemental properties of quality of life such as the concept, views, indicators, and dimension. The book will be of great interest to any scientists regardless of disciplines since it covers the main purpose of science: the improvement of quality of life.      Complex Interpersonal Conflict Behaviour Evert Van der Vliert, 2013-05-24 This book is about reactions to interpersonal conflict such as avoiding, negotiating, and fighting. It breaks away from the prevailing assumption that conflict behaviours are mutually isolated reactions having mutually isolated effects. Instead, reactions are viewed as components of complex conflict behaviour that influence each other's impact on the substantive and relational outcomes. The simultaneous and sequential occurrence of, for example, problem solving and fighting should therefore be studied together and not separately. The author presents a ladder of stepwise increases in theoretical quality and designs the sequence of chapters in such a way that the theoretical value increases step by step. The lower steps lead to the description of behavioural components and to a model of integrative and distributive dimensions. The upper steps lead to the dimensions of dual concern for one's own and the other's goals and to complexity explanations in terms of the novel paradigm of conglomerated conflict behaviour. The chapters are summarised into thirty-four interrelated propositions. Six empirical studies demonstrate the validity of crucial propositions at each level of the theoretical framework. This monograph primarily reaches out to an academic readership. However, due to its clear structure, its comprehensive propositions, its frequent use of figures, and its glossary, the book will also provide an invaluable resource for any student and practitioner interested in conflict management and negotiation.      **Transforming Power** Seth Kreisberg, 1992-01-01 This book is about power: power in the classroom in our schools and in our society. Schools, teachers, students, and teaching exist in a churning cauldron of interrelated institutions and social forces. Power relations in schools reflect these larger societal forces and the interconnections of our institutions. This book is also about empowerment: the empowerment of teachers and students. It explores the process through which people develop more control over their lives and acquire the skills and dispositions necessary to be critical and effective participants in our society. The heart of this book and Kreisberg's unique contribution to the empowerment literature is his elucidation of the difference between power over and power with: in his search to understand the nature of power that can empower individuals and communities. Kreisberg

draws upon educational political feminist and psychological theory and especially the voices of teachers in his framing of the question What are the dynamics of power that we as teachers can create in our relationships with our students that will be empowering for both our students and ourselves

**The Science of Synthesis** Debora Hammond,2011-05-18 Debora Hammond s The Science of Synthesis explores the development of general systems theory and the individuals who gathered together around that idea to form the Society for General Systems Research In examining the life and work of the SGSR s five founding members Ludwig von Bertalanffy Kenneth Boulding Ralph Gerard James Grier Miller and Anatol Rapoport Hammond traces the emergence of systems ideas across a broad range of disciplines in the mid twentieth century Both metaphor and framework the systems concept as articulated by its earliest proponents highlights relationship and interconnectedness among the biological ecological social psychological and technological dimensions of our increasingly complex lives Seeking to transcend the reductionism and mechanism of classical science which they saw as limited by its focus on the discrete component parts of reality the general systems community hoped to complement this analytic approach with a more holistic orientation As one of many systems traditions the general systems group was specifically interested in fostering collaboration and integration among different disciplinary perspectives with an emphasis on nurturing more participatory and truly democratic forms of social organization The Science of Synthesis documents a unique episode in the history of modern thought one that remains relevant today This book will be of interest to historians of science system thinkers scholars and practitioners in the social sciences management organization development and related fields as well as the general reader interested in the history of ideas that have shaped critical developments in the second half of the twentieth century

Anderson, 2020-02-13 A teacher of communication expresses his concern for thousands of students who are cheating themselves out of a worthwhile education by falling into the accepted role of nonperson uninvolved in the education process In this book the author fosters a belief that success or failure in college depends on communication interdependent efforts of people in a relationship to generate common meaning He proposes to get students to realize that their education is something other students can help them develop as much as teachers The author uses a personal style of writing to talk with the students He uses examples from the students immediate campus environment in challenging them to question their roles in the educational process Written for and tested in interpersonal communication courses the book is also appropriate for teacher education courses orientation to college life courses and for college counseling centers **Federal Probation** ,1979
