Syntax of Hungarian Zoltán Bánréti, 2022-09-22 Syntax of Hungarian aims to present a synthesis of the currently available syntactic knowledge of the Hungarian language rooted in theory but providing highly detailed descriptions and intended to be of use to researchers as well as advanced students of language and linguistics As research in language leads to extensive changes in our understanding and representations of grammar the Comprehensive Grammar Resources series intends to present the most current understanding of grammar and syntax as completely as possible in a way that will both speak to modern linguists and serve as a resource for the non specialist This volume provides a comprehensive overview and description of coordinate structures the syntactic and semantic types of conjunctions as well as the types of ellipses in sentences and short dialogues It discusses multiple conjunctions coordinated wh constructions sluicing and sentence fragments

The Syntactic Structure of Hungarian Ferenc Kiefer, Katalin Kiss, 2020-01-13 Hungarian syntax has played a vital albeit much debated role in linguistic theory since the early 1980s Volume 27 of Syntax and Semantics is the result of a project on Hungarian syntax launched in the early 1980s at the Research Institute for Linguistics of the Hungarian Academy of Sciences The volume illuminates relevant and insightful aspects of Hungarian syntax It assumes the basic theoretical claims and the basic methodology of generative linguistic theory and shows that descriptive grammar is best approached by posing theoretically interesting questions It features comprehensive coverage of Hungarian syntax and presents a complete analysis of salient questions and theories It offers new insights into Hungarian syntax and discusses the important role Hungarian syntax has played in linguistic theory throughout the past decade

The Syntax of Hungarian Noun Phrases Tibor Laczkó, 1995

Syntax of Hungarian Gábor Alberti, Peter Siptar, 2025-08-13 Syntax of Hungarian aims to present a synthesis of the currently available syntactic knowledge of the Hungarian language rooted in theory but providing highly detailed descriptions and intended to be of use to researchers as well as advanced students of language and linguistics As research in language leads to extensive changes in our understanding and representations of grammar the Comprehensive Grammar Resources series intends to present the most current understanding of grammar and syntax as completely as possible in a way that will both speak to modern linguists and serve as a resource for the non specialist The current volume discusses the internal make up as well as the distribution of infinitival constructions Topics that are covered include complementation and modification The volume also provides a brief description of other non finite constructions in Hungarian such as different types of participle and converbs

Theoretical Syntax, 1980-1990 Rosemarie Ostler, 1992 This volume is intended to be used by practicing scholars as well as students It represents all major and some of the minor trends that have evolved during the past decade Book titles from all available sources have been included as well as periodical articles from the major journals whenever there was evidence of a

theoretical approach To ensure maximum accessibility of the entries listed books and articles in language other than English and unpublished dissertations and working papers have been excluded All entries are fully annotated and the volume is completed by indices of authors and subjects

Infinitives at the Syntax-Semantics Interface Lukasz Jedrzejowski,Ulrike Demske,2017-06-26 The major aim of this volume is to investigate infinitival structures from a diachronic point of view and simultaneously to embed the diachronic findings into the ongoing theoretical discussion on non finite clauses in general All contributions subscribe to a dynamic approach to infinitival clauses by investigating their origin development and loss in miscellaneous patterns and across different languages

Elements of Comparative Syntax Enoch Aboh,Eric Haeberli,Genoveva Puskás,Manuela Schönenberger,2017-09-11 This volume brings together a selection of articles illustrating the multifaceted nature of current research in generative syntax The authors including some of the leading figures in the field present analyses of typologically diverse languages with some studies drawing on dialectal acquisitional and diachronic evidence Set against this rich empirical background the contributions address an equally wide range of theoretical issues

Handbook of Quantifiers in Natural Language Edward Keenan,Denis Paperno,2012-03-28 Covering a strikingly diverse range of languages from 12 linguistic families this handbook is based on responses to a questionnaire constructed by the editors Focusing on the formation distribution and semantic interpretation of quantificational expressions the book explores 17 languages including German Italian Russian Mandarin Chinese Malagasy Hebrew Pima Basque and more The language data sets enable detailed crosslinguistic comparison of numerous features These include semantic classes of quantifiers generalized existential generalized universal proportional partitive syntactically complex quantifiers intensive modification Boolean compounding exception phrases and several others such as quantifier scope ambiguities quantifier float and binary quantifiers Its theory independent content extends earlier work by Matthewson 2008 and Bach et al 1995 making this handbook suitable for linguists semanticists philosophers of language and logicians alike

The Semantics of Nominalizations across Languages and Frameworks Monika Rathert,Artemis Alexiadou,2010-08-31 The volume explores the semantics of nominalizations from different theoretical points of view formal and lexical semantics cognitive functional grammar lexical functional grammar discourse representation theory Data from a variety of languages are taken into account including Hungarian Italian French German and English The papers discuss the semantics of distinct readings of nominalizations and meaning differences observed between competing affixes

Syntactic Features and the Limits of Syntactic Change Jóhannes Gísli Jónsson,Thórhallur Eythórsson,2021-02-26 This volume brings together the latest diachronic research on syntactic features and their role in restricting syntactic change The chapters address a central theoretical issue in diachronic syntax whether syntactic variation can always be attributed to differences in the features of items in the lexicon as the Borer Chomsky conjecture proposes In answering this question all the chapters develop analyses of syntactic change couched within a formalist framework in which rich hierarchical structures

and abstract features of various kinds play an important role. The first three parts of the volume explore the different domains of the clause namely the C domain, the T domain and the P VP domain respectively while chapters in the final part are concerned with establishing methodology in diachronic syntax and modelling linguistic correspondences. The contributors draw on extensive data from a large number of languages and dialects including several that have received little attention in the literature on diachronic syntax such as Romeyka, a Greek variety spoken in Turkey and Middle Low German previously spoken in northern Germany. Other languages are explored from a fresh theoretical perspective including Hungarian, Icelandic and Austronesian languages. The volume sheds light not only on specific syntactic changes from a cross linguistic perspective but also on broader issues in language change and linguistic theory.

Aspects of Hungarian Syntax and the Theory of Grammar Julia Horvath, 1981

The Oxford Guide to the Uralic Languages Marianne Bakró-Nagy, Johanna Laakso, Elena Skribnik, 2022. This volume brings together leading scholars and junior researchers to provide a comprehensive account of the Uralic language family, a group of languages spoken in northern Eurasia. It will be an essential reference for students and researchers specializing in the Uralic languages and for typologists and comparative linguists more broadly.
