The Myth Of Social Cost:

The Myth of Social Cost Steven N. S. Cheung, 1978 For over 50 years economists have argued that where private costs or benefits differ from social costs or benefits in noise smells congestion pollution of the environment there is a clear case for government intervention to correct the divergence This argument has been used to justify almost endless intervention However the original analysts of social costs benefits were led into error by failing to test their propositions against the evidence of real life Painstaking empirical studies clearly demonstrate these errors A divergence between private and social cost is no decisive justification for government action to correct it The costs of intervention often outweigh the social benefits Moreover the alleged externalities are merely uncontracted effects Under private property rights the use of contracts to transact what have been regarded as external effects is far more common than has been commonly recognised The Myth of Social Cost, 2002 **The myth of social cost** Steven N. S. Cheung, 1978 **Social Costs Today** Paolo Ramazzotti, Pietro Frigato, Wolfram Elsner, 2012

This book deals with the current crises from a somewhat different the usual perspectives It claims that causes and policy implications of these crises cannot be properly assessed by focusing on allocative efficiency or income growth alone it requires a more general approach based on social costs It does not deal with social costs according to the Pigouvian or the Coasian traditions It draws on the work of Original Institutional Economics OIE such as Thorstein Veblen Karl William Kapp and Karl Polanyi on Post Keynesians such as Hyman Minsky and in general on authors who have provided insights beyond the conventional wisdom of economic thought **The Dark Places of Business**

Enterprise Pietro Frigato, Francisco J. Santos-Arteaga, 2019-04-05 This book considers Thorstein Veblen's central preoccupation with the dark places of business enterprise an integral part of the old institutional economics Combining the contributions made by Karl William Kapp and Philip Mirowski it proposes the systematization of an adjourned institutional theory of social costs of business enterprise useful for the analysis of contemporary crises The Dark Places of Business Enterprise explores the research potential of the theory of social costs for the analysis of actual business behavior in the current globalized privatization regime It begins with a detailed outline of Veblen's critique of business enterprise and market competition before illustrating the methodical enrichment of this approach through Kapp's work Finally it concludes by proposing the integration of the Veblenian Kappian approach with Mirowski's theory of markets and business doubt manufacture The resulting theory of social costs will shed light on the ubiquitous business control of society under the now dominant computer based technological infrastructure This interdisciplinary foundation of the theory of social costs encompassing knowledge from computer science and engineering to natural sciences provides the tools required to analyze this great transformation **The Valuation of Social Cost (Routledge Revivals)** David Pearce, 2014-02-04 First published in 1978 The Valuation of Social Cost is concerned both with the idea and with the practical problems of placing monetary values on intangible non marketed goods such as pollution noise nuisance personal injury or the loss of home neighbours or

recreational benefit A diverse range of contributors critically assess both the theoretical issues and the practical attempts made by economists and others to monetise items which cannot be bought or sold Each section contains a comprehensive literature review and a detailed critical appraisal Despite being written in the late 70s this book discusses issues which retain significant importance today The Social Cost of Small Families & Land Reform G. C. Mkangi,D. Parkin,2013-10-22 A

convincing argument against the widespread belief that rapid population growth is an obstacle to socio economic development while individual land ownership is a prerequisite The author presents an in depth study of traditional land tenure in Taita Kenya where the implementation of birth control programmes and the individualization of land tenure have failed to eradicate rural poverty and have brought about other sociopsychological problems This book is of vital importance to development personnel to help them place the problem of population growth in its proper perspective **Cost-Benefit**

Analysis and the Theory of Fuzzy Decisions Kofi Kissi Dompere,2004-07-13 Criticism is the habitus of the contemplative intellect whereby we try to recognize with probability the genuine quality of a literary work by using appropriate aids and rules In so doing certain general and particular points must be considered The art of interpretation or hermeneutics is the habitus of the contemplative intellect of probing into the sense of somewhat special text by using logical rules and suitable means Note Hermeneutics differs from criticism as the part does from the whole Antonius Gvilielmus Amo Afer 1727 There is no such thing as absolute truth At best it is a subjective criterion but one based upon valuation Unfortunately too many people place their fate in the hands of subjective without properly evaluating it Arnold A Kaufmann and Madan M Gupta The development of cost benefit analysis and the theory of fuzzy decision was divided into two inter dependent structures of identification and measurement theory on one hand and fuzzy value theory on the other Each of them has sub theories that constitute a complete logical system **Fuzziness and Approximate Reasoning** K. K. Dompere,Kofi Kissi

Dompere,2009-03-25 This monograph is special in its orientation and contribution to current state of our understanding of decision choice process and knowledge production Its special orientation is to bring to the scientific community the discussions on the epistemic structure of the relationships among uncertainty expectations risk possibility probability and how the rules of fuzzy paradigm and the methods of fuzzy rationality bring new and different understanding to the relationships At the level of theory of knowledge it presents the structure and epistemic analysis of uncertainty expectations and risk in decision choice actions through the characteristics of substitution transformation and input output processes in categorial dynamics of actual potential duality The interactive effects of rationality and expectation are examined around belief prospect time and conditions of belief justification where the relationship between possibility and probability as a sequential link between potential and actual is analyzed to provide some understanding of the role of relative costs and benefits in defining risk in both nature and society The concepts of possibilistic and probabilistic beliefs are explicated in relation to rationality and the decision choice process where the analytical relationship between uncertainty and expectation

formation is presented leading to the introduction of two types of uncertainty composed of fuzzy uncertainty and stochastic uncertainty

Economic Analysis of Liability Rules Satish Kumar Jain, 2014-12-01 This book focuses on the analysis of liability rules of tort law from an efficiency perspective presenting a comprehensive analysis of these rules in a self contained and rigorous yet accessible manner It establishes general results on the efficiency of liability rules including complete characterizations of efficient liability rules and efficient incremental liability rules The book also establishes that the untaken precaution approach and decoupled liability are incompatible with efficiency The economic analysis of tort law has established that for efficiency it is necessary that each party to the interaction must be made to internalize the harm resulting from the interaction The characterization and impossibility theorems presented in this book establish that in addition to internalization of the harm by each party there are two additional requirements for efficiency Firstly rules must be immune from strategic manipulation Secondly rules must entail closure with respect to the parties involved in the interaction giving rise to the negative externality i e the liability must not be decoupled
