The Nature of Early Memory Mark L. Howe, 2011-05-26 A valuable resource for anyone interested in the development of memory This text discusses the development of long term memory including autobiographical memory and argues that memory is an adaptive mechanism for the development and survival of humans and non human animals **Principles of Memory** Aimée M. Surprenant, Ian Neath, 2013-03-07 This monograph proposes 7 principles of human memory These principles are qualitative statements of empirical regularities that can serve as intermediary explanations and which follow from viewing memory as a function [Foundations of Human Memory](#) Michael Jacob Kahana, 2014-05-01 Foundations of Human Memory provides an introduction to the scientific study of human memory with an emphasis on both the major theories of memory and the laboratory studies that have been used to test those theories and inspire their further development Written with the undergraduate student in mind the text assumes no specific background in the subject but a general familiarity with scientific method and quantitative approaches to the treatment of data Foundations of human memory is organized around the major empirical paradigms used to study memory in the laboratory and the theories used to explain data obtained using those paradigms The text begins with a focus on memory for individual items building up to memory for associations between items and finally to memory for entire sequences of items and the problem of memory search Several major theories of memory are considered in detail including strength theory summed similarity theory neural network based theories retrieved context theory and theories based on the division of memory into separate short term and long term storage systems The text emphasizes basic research over applied problems but brings in real world examples and neuroscientific evidence as appropriate **Memory and Suggestibility in the Forensic Interview** Mitchell L. Eisen, Jodi

A. Quas, Gail S. Goodman, 2001-09 This book is a comprehensive balanced up to date guide for all professionals involved in forensic interviewing who need to thread their way through current controversies about the nature of memory

Forgetting Sergio Della Sala, 2010-06-10 Memory and forgetting are inextricably intertwined In order to understand how memory works we need to understand how and why we forget The topic of forgetting is therefore hugely important despite the fact that it has often been neglected in comparison with other features of memory This volume addresses various aspects of forgetting drawing from several disciplines including experimental and cognitive psychology cognitive and clinical neuropsychology behavioural neuroscience neuroimaging clinical neurology and computational modeling The first chapters of the book discuss the history of forgetting its theories and accounts the difference between short term and long term forgetting as well as the relevance of forgetting within each of the numerous components of memory taxonomy The central part summarizes and discusses what we have learned about forgetting from animal work from computational modeling and from neuroimaging Further chapters discuss pathological forgetting in patients with amnesia and epilepsy as well as psychogenic forgetting The book concludes by focusing on the difference between forgetting of autobiographical memories versus collective memory forgetting This book is the first to address the issue of forgetting from an interdisciplinary point of view but with a particular emphasis on psychology The book is scientific and yet accessible in tone and as such is suitable for advanced undergraduate and postgraduate students of psychology and related subjects such as science and neuroscience

Current Controversies in Philosophy of Memory André Sant'Anna, Christopher Jude McCarroll, Kourken Michaelian, 2022-07-29 The surge of philosophical interest in episodic memory has brought to light a number of controversial questions about this form of memory that have only recently begun to be addressed in detail This book organises discussion around six such questions offering two new chapters per question from experts in the field The questions are I What is the relationship between memory and imagination II Do memory traces have content III What is the nature of mnemonic confabulation IV What is the function of episodic memory V Do non human animals have episodic memory VI Does episodic memory give us knowledge of the past The book constitutes a valuable resource for researchers teachers and students alike For researchers it provides an up to date discussion of some of the main theories arguments and problems in the area For teachers the book can supply the readings for an entire course or particular sections can provide the readings for specific units within a broader philosophy of memory course For students the book offers accessible discussions of some of the most recent topics in the philosophy of memory which when taken together serve as a well rounded introduction to the area

Human Memory Mary B. Howes, 2006-11-22 Howes new textbook Human

Memory offers a thorough and expansive introduction to the science of remembering and forgetting. With highly accessible prose, Howes keeps the student clearly in mind as she deftly weaves together traditional and novel approaches to memory research. Unlike any other memory textbook on the market, it looks to be a definite winner in the classroom. James S. Nairne, Purdue University. Presented in a clear and accessible format, *Human Memory: Structures and Images* offers students a comprehensive overview of research in human memory. Providing a theoretical background for the research, author Mary B. Howes covers three major areas: mainstream experimental research, naturalistic research, and work in the domains of the amnesias, malfunctions of memory, and neuroscience. Key Features: Presents extensive coverage of naturalistic research. Areas of current naturalistic research, such as eyewitness testimony and courtroom procedures, are included, as are the functioning of memory under atypical or abnormal conditions and traumatic and repressed memories. Emphasizes the constructivist position. Offering greater coverage than other books on this model of memory, this text also examines the debate between constructivist and nonconstructivist theories. Offers two chapters online on computers and memory: Chapter 1 on computer functioning, simulation of memory, and Chapter 2 on computer models of long-term memory, are easily accessed online. Supplies instructors with thoughtfully crafted support material. An Instructor's Resources CD-ROM, including PowerPoint slides, study quizzes, test items, and worksheets, is available to all qualified adopters. Intended Audience: This text is designed for advanced undergraduate and graduate courses such as Memory, Human Memory, Memory and Cognition, and Memory and Forgetting.
