The Near East From Within:

Foreign Relations of the United States, 1951: The Near East and Africa, 1977 *Migration and Migrant Identities in the Near East from Antiquity to the Middle Ages* Justin Yoo, Andrea Zerbini, Caroline Barron, 2018-10-29 This book brings together recent developments in modern migration theory a wide range of sources new and old tools revisited from GIS to epigraphic studies from stable isotope analysis to the study of literary sources and case studies from the ancient eastern Mediterranean that illustrate how new theories and techniques are helping to give a better understanding of migratory flows and diaspora communities in the ancient Near East A geographical gap has emerged in studies of historical migration as recent works have focused on migration and mobility in the western part of the Roman Empire and thus fail to bring a significant contribution to the study of diaspora communities in the eastern Mediterranean Bridging this gap represents a major scholarly desideratum and by drawing upon the experiences of previously neglected migrant and diaspora communities in the eastern Mediterranean from the Hellenistic period to the early mediaeval world this collection of essays approaches migration studies with new perspectives and methodologies shedding light not only on the study of migrants in the ancient world but also on broader issues concerning the rationale for mobility and the creation and features of diaspora identities

The Near East since the First World War Malcolm Yapp, 2014-10-17 This clear balanced and authoritative survey of the history of the region is now fully up to date again The text contains a general regional introduction followed by a series of country by country analyses and a section which places the Near East in the international context Professor Yapp s new edition covers recent dramatic events including the end of the Cold War the Kuwayt Crisis of 1990 91 and the continuing conflict in Israel as well as assessing the huge social and economic changes in the region It will be essential reading for students and scholars concerned with modern middle eastern history and politics of the middle east *The Variety of Local Religious Life in the Near East* Ted Kaizer, 2008 This interdisciplinary collection of articles brings out the variety of local and regional patterns of worship in the Near East and in this manner contributes to our quest for understanding the polytheistic cults of the region as a whole **The Near East**, 1917 **The Neolithic Revolution in the Near East** Alan H.

Simmons, 2011-04-15 One of humanity s most important milestones was the transition from hunting and gathering to food production and permanent village life This Neolithic Revolution first occurred in the Near East changing the way humans interacted with their environment and each other setting the stage ultimately for the modern world Based on more than thirty years of fieldwork this timely volume examines the Neolithic Revolution in the Levantine Near East and the Mediterranean island of Cyprus Alan H Simmons explores recent research regarding the emergence of Neolithic populations using both environmental and theoretical contexts and incorporates specific case studies based on his own excavations In clear and graceful prose Simmons traces chronological and regional differences within this land of immense environmental contrasts woodland steppe and desert He argues that the Neolithic Revolution can be seen in a variety of economic

demographic and social guises and that it lacked a single common stimulus Each chapter includes sections on history terminology geographic range specific domesticated species the composition of early villages and households and the development of social symbolic and religious behavior Most chapters include at least one case study and conclude with a concise summary In addition Simmons presents a unique chapter on the island of Cyprus where intriguing new research challenges assumptions about the impact and extent of the Neolithic The Neolithic Revolution in the Near East conveys the diversity of our Neolithic ancestors providing a better understanding of the period and the new social order that arose because of it This insightful volume will be especially useful to Near Eastern scholars and to students of archaeology and the origins of agriculture

Landscapes of the Near East Tony J. Wilkinson,2003-11 Many fundamental studies of the origins of states have built upon landscape data but an overall study of the Near Eastern landscape itself has never been attempted Spanning thousands of years of history the ancient Near East presents a bewildering range of landscapes the understanding of which can greatly enhance our ability to infer past political and social systems Tony Wilkinson now shows that throughout the Holocene humans altered the Near Eastern environment so thoroughly that the land has become a human artifact albeit one that retains the power to shape human societies In this trailblazing book the first to describe and explain the development of the Near Eastern landscape using archaeological data Wilkinson identifies specific landscape signatures for various regions and periods from the early stages of complex societies in the fifth to sixth millennium B C to the close of the Early Islamic period around the tenth century A D From Bronze Age city states to colonized steppes these signature landscapes of irrigation systems tells and other features changed through time along with changes in social economic political and environmental conditions By weaving together the record of the human landscape with evidence of settlement the environment and social and economic conditions Wilkinson provides a holistic view of the ancient Near East that complements archaeological excavations cuneiform texts and other conventional sources Through this overview culled from thirty years research Wilkinson establishes a new framework for understanding the economic and physical infrastructure of the region By describing the basic attributes of the ancient cultural landscape and placing their development within the context of a

dynamic environment he breaks new ground in landscape archaeology and offers a new context for understanding the ancient Near East
