Technical Report, 1966 *The Citizen's Guide to Planning* Christopher Duerksen, Gregory Dale, Donald Elliott, 2017-11-08 APA's popular primer for citizens is all new. For decades planning officials and engaged citizens have relied on this book for a better understanding of the basics of planning. Now the authors have revised this perennial bestseller into a 21st century guide for anyone who wants to make his or her community a better place. This book describes the land use planning process, the key players in that process, and the legal framework in which decisions are made. The authors advocate principles and disciplines that will help those involved in the process make good decisions. In easy-to-understand language, they offer nuts and bolts information about different types of plans and how they are implemented. Chapters cover the goals and values of planning, the history of planning, the different people and organizations involved, the creation and implementation of a comprehensive plan, sustainability, the application review process, and legal and ethical questions.

Ruling Cases Robert Campbell, 1898 *Designing Efficient BPM Applications* Christine McKinty, Antoine Mottier, 2016-03-07 Looking for efficiency gains in your business? If you're a business analyst, this practical guide will show you how to design effective business process management (BPM) applications. Every business uses business processes; these everyday tasks help you gain and retain customers, stay profitable, and keep your operations infrastructure functioning. BPM specialists Christine McKinty and Antoine Mottier show you step by step how to turn a simple business procedure into an automated process-based application. Using hands-on examples, you'll quickly learn how to create an online process that's easy to use. Each chapter builds on earlier material. You don't have to have any programming experience to design business processes, and if you have skills in designing workflows and understanding human interactions with processes, you already have a headstart. Through the course of this book, you will: Build a prototype of an application page; Create the most frequent use flow in a process and define the data model; Generate real process forms and produce the first version of the application; Connect your application to external information systems and then build and test the complete application. *Intelligent Transport Systems* Alexander Kocian, Paolo Milazzo, Ana Lúcia Henriques Martins, Mirco Nanni, Luca Pappalardo, 2025-04-02 This book constitutes the proceedings of the 8th International Conference on Intelligent Transport Systems (INTSYS 2024) held in Pisa, Italy, during December 5-6, 2024.
