The Myth Of Americas Military Power:

The Myth of America's Military Power John J. Chodes, 1972 America has lost her first war This book explains how America's defeat in Vietnam is an inevitable consequence of the delusions of grandeur that developed out of our experiences in World War II It shows how the military establishment's obsessive belief in machine war and the exaggerated claims of victory throughout the European campaigns of the Second World War helped generate the momentum which led to the Vietnam invasion The author analyzes the three cornerstones of the machine war vision airpower armored mobility and firepower to show the absurdity of modern warfare and to demonstrate that they not only did not help America in World War II but in fact often contributed to the enemy's ability to carry on his war effort The book also attempts to dispel many of the myths associated with the Vietnamese war such as the false notion that the enemy is a guerrilla force This section shows that it was the enemy's superior strength not some obscure political economic or social reason that led to America's withdrawal The final section shows that the American vision of modern machine war is nothing more than a parody of consumerism This year's gadget must be better than last year's turned loose on the battlefield with exorbitantly expensive machines dominating the war zone with self-destructive effect Even atomic war the most hallowed of military dogmas is exposed as the fraud that it is citing the bombing of Hiroshima as a case in point Jacket flap

The Iraq Wars and America's Military Revolution Keith L. Shimko, 2010-04-30 This book is a comprehensive study of the Iraq Wars in the context of the revolution in military affairs debate **Air University Library Index to Military Periodicals**, 1974 *Air University Review*, 1983-07 **1974**

Annual Supplement Joan Schmitz Bergholt, 2013-12-21 **America's Final War** Andrei Martyanov, 2024-06-01

Washington's eight years of preparing Ukraine and its armed forces for war with Russia was a mistake of historic proportions due to its misperception of American military power based on its 1991 Gulf War victory against a minor military player Washington believed its own propaganda about crippling sanctions on Russia about the viability of its Ukrainian proxy army and the economic and military weakness of Russia spelling doom for the American empire and its rules based order By 2023 the Kiev regime could no longer exist without the West's support both financial and in war materiel By 2024 Russia will have not just exhausted Ukraine but also demilitarized NATO as a whole exposing the industrial and military impotence of the US and its European vassals The United States military as a whole and the USAF in particular have no resources or means to close the ever widening gap in capability between American and Russian Air Defenses insofar as such systems as the S 500 are already being produced serially in Russia with their immense range of more than 500 kilometers against aerial targets not to mention their full integration with Russia's Air Force and Air Defense The air space of Russia is becoming increasingly prohibitive to penetration by any combination of USAF and NATO forces The US has fallen behind and it won't be able to catch up **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1975 *The Myth of Inevitable US Defeat in Vietnam* Dale Walton, 2013-01-11 This book offers a dispassionate strategic examination of the

Vietnam conflict that challenges the conventional wisdom that South Vietnam could not survive as an independent non communist entity over the long term regardless of how the United States conducted its military political effort in Indochina
