The Myth Of Progress:

The Myth of Progress Tom Wessels, 2023-05 In this compelling and cogently argued book Tom Wessels demonstrates how our current path toward progress based on continual economic expansion and inefficient use of resources runs absolutely contrary to three foundational scientific laws that govern all complex natural systems It is a myth he contends that progress depends on a growing economy Wessels explains his theory with his three laws of sustainability 1 the law of limits to growth 2 the second law of thermodynamics which exposes the dangers of increased energy consumption and 3 the law of self organization which results in the marvelous diversity of such highly evolved systems as the human body and complex ecosystems These laws scientifically proven to sustain life in its myriad forms have been cast aside since the eighteenth century first by Western economists political pragmatists and governments attracted by the idea of unlimited growth and more recently by a global economy dominated by large corporations in which consolidation and oversimplification create large scale inefficiencies in both material and energy usage Wessels makes scientific theory readily accessible by offering examples of how the laws of sustainability function in the complex systems we can observe in the natural world around us He shows how systems such as forests can be templates for developing sustainable economic practices that will allow true progress Demonstrating that all environmental problems have their source in a disregard for the laws of sustainability that is based on the myth of progress he concludes with an impassioned argument for cultural change Publisher's website [The Myth of Progress](#) Tom Wessels, 2006 A provocative critique of Western progress from a scientific perspective **The Myth of Progress** Yvonne Burgess, 1996 A journey into the soul of Western society towards the distorted roots of our advance and developed culture which has grown to its elevated position of wealth and economic security at the expense of other cultures [Science and the Myth of Progress](#) Marhdad Zarandi, 2003-07-30 In the wake of the fall Frithjof Schuon Sacred and profane science Ren Gu non Traditional cosmology and the modern world Titus Burckhardt Religion and science Lord Northbourne Contemporary man between the rim and the axis Seyyed Hossein Nasr Christianity and the religious thought of C G Jung Philip Sherrard On earth as it is in heaven James S Cutsinger The nature and extent of criticism of evolutionary theory Osman Bakar Knowledge and knowledge D M Matheson Knowledge and its counterfeits Gai Eaton Ignorance Wendell Berry The plague of scientistic belief Wolfgang Smith Scientism the bedrock of the modern worldview Huston Smith Life as non historical reality Giuseppe Sermonti Man creation and the fossil record Michael Robert Negus The act of creation bridging transcendence and immanence William A Dembski *The Idea of Progress* Arnold Burgen, Peter McLaughlin, Jürgen Mittelstraß, 2012-10-25 No detailed description available for The Idea of Progress *The Myth of Progress* Angela Atkin, 1999-01-01 **The myth of progress with especial reference to its political implications** Theodore Lucien Shay, 1951 *The Myth of Inevitable Progress* Franco Ferrarotti, 1985 Franco Ferrarotti examines the ways in which we have come to cope with the problems unforeseen by the early idealists of the industrial age Beginning with a

detailed critique of the Enlightenment concept of the individual and how it compares to present day values beliefs and attitudes he proceeds to demonstrate how current technology influences the lives of individuals in the work place and in the community at large The influence of science and industrial progress on our development as human beings is critically analyzed Finally Ferrarotti gives some suggestions as to how we may find a way out of the dilemmas facing modern society and speculates on the fates of those societies currently in transition While many writers have dealt with specific aspects of the modern industrial age Ferrarotti faces squarely the general problem of the social and political impact of technologically based life

The Myth of Modernity Charles Baudouin, 2015-04-17 First published in 1950 this is a late work by Charles Baudouin world famous French psychologist and takes its title from the opening chapter which examines the transformation of the myth of Progress characteristic of the eighteenth and nineteenth centuries into the myth of Modernity characteristic of the time of writing The author has little sympathy for a development which he regards as essentially vulgar the myth of Progress he says had its aspiration and gave man reasons for reaching out for better things but the myth of Modernity seems to give humanity reasons only for fleeing from itself reasons for unhappiness inasmuch as the man who runs away from himself is an unhappy man This chapter is characteristic of those that follow on Baudelaire Verlaine and other literary topics on Art and the Epoch The Prestige of Action Technique versus Mysticism Opinion and Tolerance etc A broad humanity and a gentle irony are the characteristic features of this stimulating book now available again to be enjoyed in its historical context

Religion and Transhumanism Calvin Mercer, Tracy J. Trothen, 2014-11-17 Should technology be used to improve human faculties such as cognition and longevity This thought provoking dialogue between transhumanism and religion examines enhancement technologies that could radically alter the human species Transhumanism or human enhancement is an intellectual and cultural movement that advocates the use of emerging technologies to change human traits Although they may sound like science fiction the possibilities suggested by transhumanism are very real and the questions they raise have no easy answers If these enhancements especially major ones like the indefinite extension of healthy human life become widely available they would arguably have a more radical impact on humankind than any other development in history This book comprises essays that explore transhumanism and the issues that surround it addressing numerous fascinating questions posed by scholars of religion from various traditions How will immortality or extreme longevity change our religious beliefs and practices How might pharmaceuticals enhance spiritual experiences Will post human technologies be available to all persons or will a superior post human race arise to dominate the human species The discussions are as intriguing as the future they suggest
