A Moment's Notice Carol J. Greenhouse, 1996 Focusing on the problem of time the paradox of time's apparent universality and cultural relativity Carol J Greenhouse develops an original ethnographic account of our present moment the much heralded postmodern condition which is at the same time a reflexive analysis of ethnography itself She argues that time is about agency and accountability and that representations of time are used by institutions of law politics and scholarship to selectively refashion popular ideas of agency into paradigms of institutional legitimacy *A Moment's Notice* suggests that the problem of time in theory is the corollary of problems of power in practice Greenhouse develops her theory in examinations of three moments of cultural and political crisis the resistance of the Aztecs against Cortes the consolidation of China's First Empire and the recent partisan political contests over Supreme Court nominees in the United States In each of these cases temporal innovation is integral to political improvisation as traditions of sovereignty confront new cultural challenges These cases return the discussion to current issues of inequality postmodernity cultural pluralism and ethnography

Civilization of the Americas Ethan Gomez, Introduction There is much more to Mesoamerica than the Aztec Mayan and Toltec civilizations In fact several different ancient Mesoamerican civilizations had their own gods and religious beliefs These civilizations included the Olmec civilization Zapotec civilization Teotihuacan civilization Maya civilization Toltec civilization and Aztec civilization The Olmec civilization is the first known Mesoamerican civilization The name Olmec comes from the Nahuatl word for rubber people and they were pre Columbian people living in what is now southern Mexico in the modern day states of Veracruz and Tabasco The Olmecs are essential to history because they were the first Mesoamerican people to develop a writing system use hieroglyphics and construct significant stone monuments such as pyramids The calendar developed by the Olmecs was one of their most remarkable achievements They based their calendar on 365 days divided into 18 months of 20 days each plus 5 extra days at the end of each year so it was different from our current calendar They also used zero as part of their number system which is why we still use it today The Zapotec civilization was in the Oaxaca Valley Mexico This Mesoamerican civilization was known for using the Mesoamerican writing system and art The Zapotecs were one of the first civilizations in Mexico to develop a writing system They used it to write on stone or pottery but we don't know what their language sounded like because no one left any written records about them or their lives so all that remains is physical evidence like pottery with pictures and hieroglyphs carved into it This type of evidence is called epigraphic because it's an inscription on something else like a statue The city of Teotihuacan was a center of trade and politics It existed from about 300 BC until 600 AD when it was abandoned The site has been a subject of archaeology since the 19th century it is now an essential source of information on Mesoamerican civilization among the most significant early cities in pre Columbian America The city is located just north of present day Mexico City in the state province county of Mexico 65 km 40 miles northeast of the Federal District Mexico City The name Teotihuacan means place where men become gods possibly an allusion to their belief that their rulers became divine after death The Teotihuacanos were not only builders but also warriors they fought with neighboring groups over territory and resources Their most important military victory came in 378 AD against Xolalpan by capturing its ruler Cuauhtemoc and killing many Xolalpan warriors during battle After this victory they took over Xolalpan's lands including Azcapotzalco Colhuacan and Tlaxcala areas where they established their control over those regions along with other surrounding places like Cholula or Chichen Itza until finally falling into decline due to internal conflicts caused by constant wars between various ethnic groups within the Aztec Empire itself during its final years before being conquered by Spanish Conquistadors led by Hernán Cortés after they arrived

at Cempoala Island between Veracruz Tamiahua province in July 1519 *Mapping Reality* Willie Maartens,2006-06 We must clearly distinguish between reality the territory and what we perceive to be reality the map of the territory In our journey through life we need something to guide us to give us reassurance that we are on the right track Modern science has done its best to take that reassurance away from us telling us that there is no destination no purpose in life and that in effect our lives are an accident of Nature Religion too has become equally unhelpful it has become dogmatic sectarian and self serving We have lost the core the real message of religion but we still need true spirituality Indeed we need a map to the Truth **The**
