Hou presents the first biography of this important but largely overlooked vehicle for individuals with the common goal of preserving nature in American civilization. As Hou's study reveals, *Garden and Forest* was instrumental in redefining the fields of botany and horticulture while also helping to shape the fledgling professions of landscape architecture and forestry. The publication actively called for reform in government policy, urban design, and future planning for the preservation and inclusion of nature in cities. It also attempted to shape public opinion on these issues through a democratic ideal that every citizen had the right and need to access nature. These notions would anticipate the conservation and city beautiful movements that followed in the early twentieth century. Hou explains the social and environmental conditions that led to the rise of reform efforts, organizations, and publications such as *Garden and Forest*. She reveals the intellectual core and vision of the magazine as a proponent of the city natural movement that sought to relate nature and civilization through the arts and sciences. *Garden and Forest* was a staunch advocate of urban living made better through careful planning and design. As Hou shows, the publication also promoted forest management and preservation not only as a natural resource but as an economic one. She also profiles the editors and contributors who set the magazine's tone and follows their efforts to expand America's environmental expertise. Through the pages of *Garden and Forest*, the early period of environmentalism was especially fruitful and optimistic; many individuals joined forces for the benefit of humankind and helped lay the foundation for a coherent national movement. Shen Hou's study gives *Garden and Forest* its due and adds an important new chapter to the early history of American environmentalism.

Natural Beauty Elizabeth TenHouten, 2013-06-25 Combining a wealth of tips and 75 recipes for all natural beauty aids using nothing but pure ingredients direct from Mother Nature with a philosophical approach to beauty as the foremost purpose of human existence, *Natural Beauty* inspires readers to pursue a natural, healthful approach to caring for their mind, body, and soul. For Elizabeth TenHouten, the pursuit of beauty is cyclical. We exist in a parallel state of reaching for beauty. So this dialectical tension of reaching for and returning to beauty is the cyclical state of beauty. In her new book *Natural Beauty*, TenHouten lays out a philosophy of beauty that encompasses physical, mental, and spiritual well-being, an integrated approach that addresses the whole person. *Natural Beauty* includes a wide variety of all natural beauty tips and tricks, drawing on everyday ingredients with amazing healthful properties.

Natural Beauty Ronald M. Moore, 2008 *Natural Beauty* presents a bold new philosophical account of the principles involved in making aesthetic judgments about natural objects. It surveys historical and modern accounts of natural beauty and weaves elements derived from those accounts into a syncretic theory that centers on key features of aesthetic experience, specifically features that sustain and reward attention. In this way, Moore's theory sets itself apart from both the purely cognitive and the purely emotive approaches that have dominated natural aesthetics until now. *Natural Beauty* shows why aesthetic appreciation of works of art and aesthetic appreciation of nature can be mutually reinforcing; that is, how they are cooperative rather than rival enterprises. Moore also makes a compelling case for how and why the experience of natural beauty can contribute to the

larger project of living a good life *The Nature of Cities* Michael Bennett, David Warfield Teague, 1999-10 Cities are often thought to be separate from nature but recent trends in ecocriticism demand that we consider them as part of the total environment This new collection of essays sharpens the focus on the nature of cities by exploring the facets of an urban ecocriticism by reminding city dwellers of their place in ecosystems and by emphasizing the importance of this connection in understanding urban life and culture The editors both raised in small towns but now living in major urban areas are especially concerned with the sociopolitical construction of all environments both natural and manmade Following an opening interview with Andrew Ross exploring the general parameters of urban ecocriticism they present essays that explore urban nature writing city parks urban wilderness ecofeminism and the city and urban space The volume includes contributions on topics as wide ranging as the urban poetry of English writers from Donne to Gay the manufactured wildness of a gambling casino and the marketing of cosmetics to urban women by idealizing Third World naturalness These essays seek to reconceive nature and its cultural representations in ways that contribute to understanding the contemporary cityscape They explore the theoretical issues that arise when one attempts to adopt and adapt an environmental perspective for analyzing urban life The Nature of Cities offers the ecological component often missing from cultural analyses of the city and the urban perspective often lacking in environmental approaches to contemporary culture By bridging the historical gap between environmentalism cultural studies and urban experience the book makes a statement of lasting importance to the development of the ecocritical movement
