The New Heartland

John McPhee, Carol Rigolot

The New Heartland:

Heartlands of Eurasia Anita Sengupta, 2009-07-16 Heartlands of Eurasia explores how received metageographical knowledge informs the understanding of global processes and is subsequently transformed into geopolitical reasoning with foreign policy implications. It provides a detailed examination of writings from both within the region and outside that look into the significance of Halford Mackinder's heritage in the context of a vastly changed world situation. In particular, it attempts to examine how policy makers and strategic thinkers have used these geopolitical concepts as justification for their policy in the region. Finally, it attempts an analysis of the extent to which this policy thinking was translated into practice. While the study looks into how the vision of the pivotal significance of a vast expanse of land finds its echoes in contemporary narratives, it also underlines the very creative ways in which Mackinder's ideas have been reinterpreted in keeping with the changing global dynamics. Making use of the way in which the region has been traditionally defined and the way in which the people defined themselves, the study brings into focus a debate on the usefulness of region or area based studies that are located in geographical imaginations. Anita Sengupta uses this connection to examine the following issues: geopolitical imaginations and their relevance in identifying areas in the present context; the intersection between how areas are defined from an outsider perspective and how people define themselves; the extent to which these definitions have influenced policy and the possibility or feasibility of the development of alternative geostrategic discourses. Mackinder himself did not specify the geographical area identified first as the pivot and later the heartland, but his ideas were focused on the closed heartland of Euro Asia, an area that was unassailable by sea power. This study therefore centers its debates around the Eurasian space in general, though the focus is on the Central Asian region and Uzbekistan in particular. The book is ideal for specialists working on the Eurasian region, graduate students interested in geopolitics as well as Eurasian and Central Asian studies, and undergraduates studying political science and international relations.

American Theocracy Kevin Phillips, 2006-03-21 An explosive examination of the coalition of forces that threatens the nation from the bestselling author of American Dynasty. In his two most recent bestselling books, American Dynasty and Wealth and Democracy, Kevin Phillips established himself as a powerful critic of the political and economic forces that rule and imperil the United States, tracing the ever more alarming path of the emerging Republican majority's rise to power. Now Phillips takes an uncompromising view of the current age of global overreach, fundamentalist religion, diminishing resources, and ballooning debt under the GOP majority. With an eye to the past and a searing vision of the future, Phillips confirms what too many Americans are still unwilling to admit about the depth of our misgovernment.

Hollowing Out the Middle Patrick J. Carr, Maria J. Kefalas, 2009-10-01 Two sociologists reveal how small towns in Middle America are exporting their most precious resource, young people, and share what can be done to save these dwindling communities. In 2001, with funding from the MacArthur Foundation, sociologists Patrick J. Carr and Maria J. Kefalas moved to Iowa to understand the rural brain drain and the exodus of young people from America's

countryside They met and followed working class stayers ambitious and college bound achievers seekers who head off to war to see what the world beyond offers and returners who eventually circle back to their hometowns What surprised them most was that adults in the community were playing a pivotal part in the town s decline by pushing the best and brightest young people to leave In a timely new afterword Carr and Kefalas address the question so what can be done to save our communities They profile the efforts of dedicated community leaders actively resisting the hollowing out of Middle America These individuals have creatively engaged small town youth stayers and returners seekers and achievers and have implemented a variety of programs to combat the rural brain drain These stories of civic engagement will certainly inspire and encourage readers struggling to defend their communities *The Emerging Republican Majority* Kevin P. Phillips,2014-11-23 One of the most important and controversial books in modern American politics *The Emerging Republican Majority* 1969 explained how Richard Nixon won the White House in 1968 and why the Republicans would go on to dominate presidential politics for the next quarter century Rightly or wrongly the book has widely been seen as a blueprint for how Republicans using the so called Southern Strategy could build a durable winning coalition in presidential elections Certainly Nixon s election marked the end of a New Deal Democratic hegemony and the beginning of a conservative realignment encompassing historically Democratic voters from the South and the Florida to California Sun Belt in the book s enduring coinage In accounting for that shift Kevin Phillips showed how two decades and more of social and political changes had created enormous opportunities for a resurgent conservative Republican Party For this new edition Phillips has written a preface describing his view of the book its reception and how its analysis was borne out in subsequent elections A work whose legacy and influence are still fiercely debated *The Emerging Republican Majority* is essential reading for anyone interested in American politics or history *The Routledge Research Companion to Energy Geographies* Stefan Bouzarovski,Martin J Pasqualetti,Vanesa Castán Broto,2017-07-06 Energy has become a central concern of many strands of geographical inquiry from global climate change to the effects of energy decisions on our lives However many aspects of the black box of relationships at the energy society interface remain unopened especially in terms of the spatial underpinnings of energy production and consumption within nations cities and regions Debates focusing on the location and nature of energy flows frequently fail to consider the multiple geographical networks that illustrate and explain the distribution of fuels and services around the world Providing an integrated perspective on the complex interdependencies between energy and geography *The Routledge Research Companion to Energy Geographies* offers a timely conceptual framework to study the multiple facets of energy geography including security space and place planning environmental science economics and political science Illustrating how a geographic approach towards energy can aid decision making pathways in the domains of social justice and environment this book provides insights that will help move the international community toward greater cooperation stability and sustainability Navy-Marine Corps ,1961 Americanizing Japanese Firms Yukio

Yotsumoto,2010-05-10 Americanizing Japanese Firms examines the concept of corporate social responsibility in Japanese manufacturing companies within the United States The study compares the corporate philanthropy of Japanese companies against American and British companies Specifically the study investigates characteristics of Japanese companies that influence the level and nature of the corporate philanthropy undertaken The relationship between size of the company and the level and nature of corporate social responsibility is also examined Finally the study explores how Japanese corporations learn about the American approach of corporate philanthropy In his investigations the author considered two contexts first the constitutions of Japan and the United States are analyzed at a national level to determine the position or importance of corporate philanthropy within the societies comparatively and second the communities in which corporations are located and act for social contribution are investigated **FCC Record** United States.
