Common Threads Sally Dwyer-McNulty, 2014-04-15 A well illustrated cultural history of the apparel worn by American Catholics Sally Dwyer McNulty's Common Threads reveals the transnational origins and homegrown significance of clothing in developing identity unity and a sense of respectability for a major religious group that had long struggled for its footing in a Protestant dominated society often openly hostile to Catholics Focusing on those who wore the most visually distinct clothes priests women religious and schoolchildren the story begins in the 1830s when most American priests were foreign born and wore a variety of clerical styles Dwyer McNulty tracks and analyzes changes in Catholic clothing all the way through the twentieth century and into the present which finds the new Pope Francis choosing to wear plain black shoes rather than ornate red ones Drawing on insights from the study of material culture and of lived religion Dwyer McNulty demonstrates how the visual lexicon of clothing in Catholicism can indicate gender ideology age and class Indeed clothing itself has become a kind of Catholic language whether expressing shared devotional experiences or entwined with debates about education authority and the place of religion in American society

Driven by Fear Guenter B Risse, 2015-12-30 From the late nineteenth century until the 1920s authorities required San Francisco's Pesthouse to segregate the diseased from the rest of the city Although the Pesthouse stood out of sight and largely out of mind it existed at a vital nexus of civic life where issues of medicine race class environment morality and citizenship entwined and played out Guenter B Risse places this forgotten institution within an emotional climate dominated by widespread public dread and disgust In *Driven by Fear* he analyzes the unique form of stigma generated by San Franciscans Emotional states like xenophobia and racism played a part Yet the phenomenon also included competing medical paradigms and unique economic needs that encouraged authorities to protect the city's reputation as a haven of health restoration As Risse argues public health history requires an understanding of irrational as well as rational motives To that end he delves into the spectrum of emotions that drove extreme measures like segregation and isolation and fed psychological ideological and pragmatic urges to scapegoat and stereotype victims particularly Chinese victims of smallpox leprosy plague and syphilis Filling a significant gap in contemporary scholarship *Driven by Fear* looks at the past to offer critical lessons for our age of bioterror threats and emerging infectious diseases
