Situating the Subject in Film Theory Veijo Hietala, 1990 *Situating the Subject in Film Theory*, 1990 **The Art of Theatrical Sound Design** Victoria Deiorio, 2018-09-20 Emphasising the artistry behind the decisions made by theatrical sound designers this guide is for anyone seeking to understand the nature of sound and how to apply it to the stage Through tried and tested advice and lessons in practical application *The Art of Theatrical Sound Design* allows developing artists to apply psychology physiology sociology anthropology and all aspects of sound phenomenology to theatrical sound design Structured in three parts the book explores theoretically how human beings perceive the vibration of sound offers exercises to develop support for storytelling by creating an emotional journey for the audience considers how to collaborate and communicate as a theatre artist and discusses how to create a cohesive sound design for the stage *Sound / image* Sarah Cardwell, Jonathan Bignell, Lucy Fife Donaldson, 2022-04-26 An exciting new strand in The Television Series the Moments in Television collections celebrate the power and artistry of television whilst interrogating key critical concepts in television scholarship Each Moments book is organised around a provocative binary theme Sound image reassesses the synergy between televisual images and sounds and music as a key creative interaction warranting closer attention Through close scrutiny of visual and sonic elements the book's chosen programmes are persuasively illuminated in new ways The book explores an eclectic range of TV fictions dramatic and comedic Contributors from diverse perspectives come together to expand and enrich the kind of close analysis most commonly found in television aesthetics Sustained detailed programme analyses are sensitively framed within historical technological institutional cultural creative and art historical contexts

Sound Worlds from the Body to the City Ariane Wilson, 2019-03-13 This volume reveals the extent to which aural perception influences our spatial awareness Spanning various fields and practices from psychology to geography and from zoology to urban planning it covers a range of environments in which sounds contribute to forming our sense of space and place The contributions gathered here lead from the mother's womb through the habitats of insects and owls to the resonating bodies of buildings and the city to artistic endeavours that aim to consciously reveal the spatiality of sound In this progression the book demonstrates the profoundly constitutive role of hearing and listening at all stages of our biological and social development as well as the epistemological phenomenological and emotional importance of sound in relation to our construction of space As such it will appeal not only to architects town planners and artists but also to the growing community of scientists and scholars intrigued by sonic issues Differing from both quantitative acoustics and sound design its approach opens new perspectives on the sonic dimension and aural understanding of our environment by tracing analogies between a diversity of spaces formed when sound interacts with listening as a mode of attention *Situating Cindy Sherman* Sarah Patricia Evans, 2004 **Sonic Interventions** Sylvia Mieszkowski, Joy Smith, Marijke de Valck, 2015-07-14 *Sonic Interventions* makes a compelling case for the importance of sound in theorizing literature subjectivity and culture

Sound is usually understood as our second sense and as our belief in a visually dominated culture prevails remains of secondary interest. Western cultures are considered to be predominantly visual while other societies are thought to place more importance on the acoustic dimension. This volume questions these assumptions by examining how sound differs from and acts in relationship to the visual. It moves beyond theoretical dichotomies between the visual and the sonic, the oral and literature, and instead investigates sonic interventions in their often multi-faceted forms. The case studies deal with political appropriations of music and sounds; they explore the poetic use of the sonic in novels and plays; they develop theoretical concepts out of sonic phenomena and pertain to identity formation and the practice of mixing in hip hop, opera and dancehall sessions. Ultimately, the book brings to the fore what roles sound may play for the formation of gendered identity, for the stabilization or questioning of race as a social category and the conception of place. Their intricate interventions beckon critical attention and offer rich material for cultural analysis.
