De Vos, 2004-03-12 Cross Cultural Dimensions in Conscious Thought represents a major contribution describing an empirically validated method for analyzing the thematic content of narratives as a tool for comparative research in Anthropology Cultural Psychology and Ethnopsychiatry This second volume in the two volume series presents research conducted in Ireland Kenya Japan the Philippines Canada the United States India Brazil and Venezuela This research illustrates for the cross cultural researcher the usefulness of projective techniques as a means for eliciting culturally relevant information from informants It also exemplifies how the analysis of narrative themes when it is related to other material obtained in field settings can reveal meaningful within group and between group differences in human experience and can help us make sense of conscious human experience across a wide range of sociocultural contexts *Research Relating to Children*, 1955 *Teacher's Manual for Work Books in Citizenship Training for Children ... of the Elementary School* Walter L.
