Butler, 2023-04-28 The quality of the reprint is nearly perfect with a good selection of papers for the three sequential parts of the book the texts the drawings and the black and white photographs Text and drawings are on matte heavyweight pages while the photos are on glossy paper The inks make everything read well in particular the drawing reproductions are exquisite Archidose Edwin Lutyens one of the most famous architectural names of the 20th century died in 1944 As a memorial three large volumes of his drawings and photographs were commissioned from the thousands found in his office and were published by Country Life All three volumes will be republished in 2023 The first volume contains his own plans elevations and copious details of the finest examples of his domestic buildings on which his huge reputation principally rests The book embodies the quintessence of the man and his work the variety of style and design seen in the houses brings together in one volume the many strands of Lutyens's fertile mind Two further volumes will include his corporate and public buildings The genius of Lutyens is now universally recognized In the work featured in this book we can now see not just the professionalism of a great architect but also the loving care with which he set down the most minute detail with the result that this is one of the few books in existence that can be used to provide working drawings

Memorial to the Missing of the Somme Gavin Stamp,2010-08-06 Edwin Lutyens Memorial to the Missing of the Somme at Thiepval in Northern France visited annually by tens of thousands of tourists is arguably the finest structure erected by any British architect in the twentieth century It is the principal tangible expression of the defining event in Britain s experience and memory of the Great War the first day of the Battle of the Somme on 1 July 1916 and it bears the names of 73 000 soldiers whose bodies were never found at the end of that bloody and futile campaign This brilliant study by an acclaimed architectural historian tells the origin of the memorial in the context of commemorating the war dead it considers the giant classical brick arch in architectural terms and also explores its wider historical significance and its resonances today So much of the meaning of the twentieth century is concentrated here the Thiepval Memorial to the Missing casts a shadow into the future a shadow which extends beyond the dead of the Holocaust to the Gulag to the disappeared of South America and of Tianenmen Reissued in a beautiful and striking new edition for the centenary of the Somme **Sir John Soane?**

Influence on Architecture from 1791 Oliver Bradbury,2017-07-05 Sir John Soane s Influence on Architecture from 1791 A Continuing Legacy is the first in depth study of this eighteenth century British architect s impact on the work of others extending globally and still indeed the case over 200 years later Author Oliver Bradbury presents a compelling argument that the influence of Soane 1753 1837 has persevered through the centuries rather than waning around the time of his death Through examinations of internationally renowned architects from Benjamin Henry Latrobe to Philip Johnson as well as a number of not so well known Soanean disciples Bradbury posits that Soane is perhaps second only to Palladio in terms of the longevity of his influence on architecture through the course of more than two centuries from the early 1790s to today concluding with the recent return to pure revivalism Previous investigations have been limited to focusing on Soane s late Georgian and then post modern influence this is the first in depth study of his impact over the course of two centuries Through this survey Bradbury demonstrates that Soane s influence has been truly international in the pre modern era reaching throughout the British Isles and beyond to North America and even colonial Australia Through his inclusion of

select detailed case studies Bradbury contends that Soane's is a continuing not negated legacy in architecture **The Greenwood Encyclopedia of Homes through World History** James M. Steele, 2009-03-30 The house throughout history in every place in the world has been built to provide shelter from the elements The dwellings that have resulted are as different as the people that have built them the social norms that prevailed at the time and place in which they were built and the natural environment that they adapted to Studying them now in a comprehensive way allows us to understand the social political economic and religious conditions that existed for their inhabitants They are a three dimensional record of culture Twenty four pages of color images along with black and white images through three volumes illustrate the homes of people throughout the world The volumes cover ancient times to the late Middle Ages the Renaissance to the Industrial Revolution and the Post Industrial Revolution to the Present
