The Rationale for Re-Structuring the Vocational Education in India Tilak Kumar Sharma, 2016-04-01 The intention of this book is to probe into a critical pedagogy of career education as a vital means to enhance vocationalization in an authentic sense The book basically focuses on the need to re structure the system and proposes the use of productive learning as a foundation for a well rounded education that breaks down the dreadfully despicable dualisms of contemporary education that is the separation of theory from practice individuals from collectivity and schools from community It also aims at exposing students to three viable requirements the need for effective acquisition of skills a critical pedagogy of occupational demands and proper understanding of the potential resources for community development and prosperity The implication is that creative activities productive behavior should move away from the single priority of economic advancement and profit toward the integration of developmental objectives for social and economic enlistment and effective mobilization

Private Sector Development in an Emerging World Diederik Boer, Harald Sander, Katharina Friz, Antonella Anastasi, 2023-12-04 This book explores the interactions between private sector development public policies and societal institutions with a strong view on contributing to sustainable and inclusive development in emerging countries The private sector is often praised as an engine of economic growth This belief has led to significant efforts to promote private sector development in emerging countries Development agencies prioritize private sector development and national governments are following suit resulting in often huge incentives to stimulate and attract private investment However private sector development is not a panacea for sustainable and inclusive development as the past decades have clearly shown Economic growth societal development and environmental sustainability are often in a sharp conflict and more often than not economic growth has failed to improve the lives of all citizens This book examines the role the state and the private sector should play to benefit from the dynamics of business development while ensuring that these benefits are shared broadly without jeopardizing sustainability The views presented differ in detail but the analyses and case studies presented share common themes namely that the relative roles of state and private sector of should be balanced and that this particular balance should be based on the context of each country in order to make the private public sector interaction work for all people
