Slavery The Southern Economy:

Slavery and the Southern Economy Harold D. Woodman, 1966 Old South/new South Gavin Wright, 1986-05-13 An original and economically rigorous analysis of the role of slavery in generating economic backwardness Wright traces key reasons for the South's century long status as a second class country within a country and assesses the legacy of slavery the material devastation and social upheaval of the Civil War and the colonial exploitation of the South by northern capital He maintains that above all the defining feature of the southern economy was the isolation of its labor market from national and international development On this basis Wright explains the sharecropping system the Populist revolt the South's limited investment in the education of its own people and the low skill low productivity colonial character of the region's industrial progress Only the intervention of the Federal Government during the Great Depression the author argues destroyed the bases of the South's low wage economy led to long delayed mechanization of the plantation helped close the North South wage gap and created massive out migration of unskilled labor during and after World War II With the demise of the plantation regime the South opened its doors to outside flows of capital and labor **The American Economy 1860-1940** A. J. Youngson Brown, 2006 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company

Slavery and the Southern Economy Harold D. Woodman, 1966 *The Political Economy of Slavery* Eugene D. Genovese, 2012-01-01 This classic study of antebellum Southern society demonstrates how slavery was the bedrock of the region's social order and cultural identity In *The Political Economy of Slavery* Eugene Genovese argues that slavery gave the South a distinct class structure political community economy ideology and a set of psychological patterns As a result the South grew away from the rest of the nation and became increasingly unstable during the nineteenth century The difficulties it faced economic political moral and ideological constituted a fundamental antagonism between modern and premodern worlds Southern slavery was the foundation on which rose a powerful social class which in turn dominated Southern society While they constituted only a tiny portion of the white population they were powerful enough to largely succeed at building a new or rather rebuilding an old civilization Essays on the Postbellum Southern Economy University of Texas at Arlington, 1985 A fledgling system of capitalist agriculture transformed former slaves into wage workers and former masters into employers yet neither group could comfortably fit into its new role Armstead L Robinson discusses black freedom in the postbellum South and the new set of social relationships that emerged while Thavolia Glymph traces the evolution of the share wage system into sharecropping Barbara J Fields explores the erratic advance of capitalism in the New South and its effects on the southern economy Harold D Woodman concludes that emancipation alone could not guarantee the triumph of a completely new social order on post war cotton plantations *Slavery and American Economic Development* Gavin Wright, 2013-02-18 Through an analysis of slavery as an economic institution Gavin Wright presents an innovative look at the economic divergence between North and South in the antebellum era He draws a distinction between slavery as a form of

work organization the aspect that has dominated historical debates and slavery as a set of property rights Slave based commerce remained central to the eighteenth century rise of the Atlantic economy not because slave plantations were superior as a method of organizing production but because slaves could be put to work on sugar plantations that could not have attracted free labor on economically viable terms *Modernizing a Slave Economy* John Majewski, 2011-04-01 What would separate Union and Confederate countries look like if the South had won the Civil War In fact this was something that southern secessionists actively debated Imagining themselves as nation builders they understood the importance of a plan for the economic structure of the Confederacy The traditional view assumes that Confederate slave based agrarianism went hand in hand with a natural hostility toward industry and commerce Turning conventional wisdom on its head John Majewski's analysis finds that secessionists strongly believed in industrial development and state led modernization They blamed the South's lack of development on Union policies of discriminatory taxes on southern commerce and unfair subsidies for northern industry Majewski argues that Confederates opposition to a strong central government was politically tied to their struggle against northern legislative dominance Once the Confederacy was formed those who had advocated states rights in the national legislature in order to defend against northern political dominance quickly came to support centralized power and a strong executive for war making and nation building
