Department of Justice, 1975 Sociology and Social Research, 1987-10 **Crime and Public Policy** James Q. Wilson, Joan Petersilia, 2012-06-01 Crime in the United States has fluctuated considerably over the past thirty years as have the policy approaches to deal with it During this time criminologists and other scholars have helped to shed light on the role of incarceration prevention drugs guns policing and numerous other aspects to crime control Yet the latest research is rarely heard in public discussions and is often missing from the desks of policymakers This book accessibly summarizes the latest scientific information on the causes of crime and evidence about what does and does not work to control it Thoroughly revised and updated this new version of Crime and Public Policy will include twenty chapters and five new substantial entries As with previous editions each essay reviews the existing literature discusses the methodological rigor of the studies

identifies what policies and programs the studies suggest and then points to policies now implemented that fail to reflect the evidence. The chapters cover the principle institutions of the criminal justice system: juvenile justice, police, prisons, probation and parole, sentencing, how broader aspects of social life inhibit or encourage crime, biology, schools, families, communities and topics currently generating a great deal of attention: criminal activities of gangs, sex offenders, prisoner reentry, changing crime rates. With contributions from trusted leading scholars, *Crime and Public Policy* offers the most comprehensive and balanced guide to how the latest and best social science research informs the understanding of crime and its control for policymakers, community leaders and students of crime and criminal justice. *Crime, Inequality and Power* Eileen B.

Leonard, 2015-04-10 *Crime Inequality and Power* challenges the dominant definitions of crime and the criminal through its uniquely comparative approach. In this book Eileen Leonard analyzes multiple forms of criminal behavior in the United States including violence, sexual assault, theft and drug law violations whilst also asking readers to consider the parallels between crimes that are rarely thought comparable. Leonard's juxtaposition of familiar street crimes such as car theft alongside large scale corporate theft vividly exposes profound inequalities in the way crime is defined and the treatment it receives within the criminal justice system. Leonard's analysis also reveals the underlying inequalities of race, class and gender which enable the perpetuation of such crimes as well as calling into question the reality of fundamental American ideals of fairness and equal justice. Moreover, the book questions whether current policies that punish street crime excessively while minimizing the crimes of the powerful fail to keep the public safe. A broader consideration of crime and the inequalities that underlie it offers a fresh opportunity to rethink public policies and enduring issues of crime and criminal justice. Challenging the many persistent inequalities in the perception of and response to crime, this critique of American crime and punishment will be of interest to undergraduate and postgraduate students as well as scholars in the fields of criminology, sociology and law.

Ethnomethodology and the Human Sciences Graham Button, 1991-08-30 Through its empirical inquiries into the ordered properties of social action, this text demonstrates how ethnomethodology provides a radical respecification of the foundations of the human sciences, an achievement that has often been misunderstood. **Handbook of Crime Correlates** Lee

Ellis, Kevin M. Beaver, John Wright, 2009-05-07 Over the past two centuries many aspects of criminal behavior have been investigated. Finding this information and making sense of it all is difficult when many studies would appear to offer contradictory findings. The *Handbook of Crime Correlates* collects in one source the summary analysis of crime research worldwide. It provides over 400 tables that divide crime research into nine broad categories: Pervasiveness and intra-offending relationships; Demographic factors; Ecological and macroeconomic factors; Family and peer factors; Institutional factors; Behavioral and personality factors; Cognitive factors; Biological factors; Crime victimization and fear of crime. Within these broad categories, tables identify regions of the world and how separate variables are or are not positively or negatively associated with criminal behavior. Criminal behavior is broken down into separate offending categories of violent crime

property crime drug offenses sex offenses delinquency general and adult offenses and recidivism Accompanying each table is a description of what each table indicates in terms of the positive or negative association of specific variables with specific types of crime by region This book should serve as a valuable resource for criminal justice personnel and academics in the social and life sciences interested in criminal behavior

The Psychology of Criminal Conduct D.A. Andrews, James Bonta, 2014-09-19 This book provides step by step procedures to help police administrators execute their duties and fulfill their responsibilities more effectively efficiently and productively Divided into sections behavioral aspects of police management functional aspects of police management and modern police management major issues it introduces the reader to a broad range of topics with which all police managers should be familiar
