Sociology/technology Jay A. Weinstein,1982 *Thinking Through Technology* Carl Mitcham,1994-10-15 This introduction to the philosophy of technology discusses its sources and uses Tracing the changing meaning of technology from ancient times to the modern day it identifies two important traditions of critical analysis of technology the engineering approach and the humanities approach **Paradox and Society** Louis Schneider,2023-03-31 The writings of Bernard Mandeville mark an important transition between enlightenment social philosophy and modern science Born in Holland in 1670 and educated as a physician Mandeville spent the greater part of his working life in England where he died in 1733 In some respects Mandeville can be compared to Voltaire Mandeville s junior by twenty four years Mandeville had the knack of making controversies volcanic and of arousing heated debate about any topic on which he chose to comment and he chose to comment on virtually everything He was especially¹ interested in social evolution morality and society prostitution and romantic love crime and its deterrence and in social aspects of religion His views on these and countless other topics cohere in his continual fascination with the consequences of social and economic actions that run counter to anticipations and intentions and in the paradoxical or ironic cast that such outcomes often have In *Paradox and Society* Louis Schneider is the first to offer a full consideration of Mandeville as a sociologist Schneider offers an intellectual and characterological portrait of Mandeville examining his writings and reactions to him over time Schneider goes on to review Mandeville s theory of human nature and explores his hotly contested notion of the paradox of private vices and public benefits that the arousal of desires is a necessary precondition for the stimulation of social and economic development Social action outside the marketplace and Mandeville s problematic theory of social evolution are next considered The volume ends with an examination of paradox irony and satire in society In this detailed analysis of one of the world s most controversial social critics Schneider shows us that Mandeville offers a vision of human society that is of enduring significance He challenges the reader to consider how that vision might operate in today s world *The Changing Face of Globalization* Samir Dasgupta,2004-12-08 Evaluating the impact of globalization on issues like altruism empowerment of women crime and violence culture area studies economy and production and the sociology of humanity this book makes the ethical and moral aspects of globalization its main concerns The complexities of the globalization process in the developing world are explored the debate between globalization and localization between indigenization and hybridization between equalization and inequalization The contributors also examines the consequences for transitional economies in their interactions with multinational corporations and the rise of the anti globalization movement in the past decade **Social Change** Jay Weinstein,2010-06-16 This introduction to social change covers the momentous and relatively recent changes that have occurred in the human condition examining not only the major causes and conditions underlying our current situation but also the main choices and options we face as we strive to shape our individual and collective futures This edition of Social

The Mythmakers Raj P. Mohan, 1987-10-20 This unique collection brings together various scholars of sociology and political science to explore the status and activities of the intellectuals and the intelligentsia past present and future The intellectuals and intelligentsia perform a social role as well as a mental function and are products of their age and country Their role in various parts of the globe and in different historical periods is compared and contrasted Long range historical perspective is provided by an essay on the sociology of intellectual creativity in the axial period of human history In addition the role of the intellectual and intelligentsia and its implications for the future development of Third World nations is considered Underdeveloping the Amazon Stephen G. Bunker, 1988

Underdeveloping the Amazon shows how different extractive economies have periodically enriched various dominant classes but progressively impoverished the entire region by disrupting both the Amazon Basin's ecology and human communities. Contending that traditional models of development based almost exclusively on the European and American experience of industrial production cannot apply to a regional economy founded on extraction, Stephen G. Bunker proposes a new model based on the use and depletion of energy values in natural resources as the key to understanding the disruptive forces at work in the Basin.
