Sharkey, 2012-08-31 Sociology and Catholic Social Teaching Contemporary Theory and Research

contains essays by key scholars in the territory where Catholic social thought and secular sociology meet and offers a much needed alternative to the relativism and individualism that so often characterize social scientific analysis today Contributors to this volume argue that Catholic social teaching as articulated so powerfully today in recent papal encyclicals and major summations such as the Compendium of the Social Doctrine of the Church offers a powerful moral framework for addressing today's pressing social problems This is especially true since many of its tenets find solid support in social scientific research on the nature of the person and the workings of culture and social institutions Sponsored by the Society of Catholic Social Scientists and including work by sociologists from both the Society and the Pontifical Academy of Social Sciences this volume is offered in the spirit of Pope John Paul II's exhortation to draw from contemporary social science whatever can help the Church better understand contemporary social issues and trends and thus better serve humanity Specific articles address such topics as the Church as a virtual nation in the international arena changing cultural norms regarding deviance the historical and contemporary relationship between Catholicism and mainstream academic sociology empirical support for a natural law perspective on family relations the social psychology of happiness and moral behavior among emerging adults the sociology of knowledge from a distinctively Catholic perspective and how the principles of subsidiarity and solidarity can be used to analyze and evaluate the functioning of institutions like the family education and the state Each author also offers some autobiographical reflections on how they relate sociology and their life of Faith This anthology will interest scholars in both sociology and Catholic social thought as well as advanced undergraduate and graduate students in these areas

Beyond the Sociology of Development Ivar Oxaal, Tony Barnett, David Booth, 2012-08-21 Conceived as a response to the economic naivety and implicit metropolitan bias of many 1950s and 60s studies of the sociology of development this volume first published in 1975 provides actual field studies and theoretical reviews to indicate the directions which a conceptually more adequate study of developing societies should take Much of the book reflects strongly the influence of Andre Gunder Frank but the contributors adopt a critical attitude to his ideas applying them in empirical situations within such African and American countries as Kenya Guyana Tanzania and Peru Others pursue the lines of enquiry opened up by Latin American theories of economic dependency and by the new school of French economic anthropology
