Soft Words for a Hard Technology Brian R.

Smith, 1984-01-01 **Cyberbullies, Cyberactivists, Cyberpredators** Lauren Rosewarne, 2016-01-25 Written by an expert in media popular culture gender and sexuality this book surveys the common archetypes of Internet users from geeks nerds and gamers to hackers scammers and predators and assesses what these stereotypes reveal about our culture's attitudes regarding gender technology intimacy and identity The Internet has enabled an exponentially larger number of people individuals who are members of numerous and vastly different subgroups to be exposed to one other As a result instead of the simple jocks versus geeks paradigm of previous eras our society now has more detailed stereotypes of the undesirable the under the radar and the ostracized cyberperverts neckbeards goths tech nerds and anyone with a non heterosexual identity Each chapter of this book explores a different stereotype of the Internet user with key themes such as gender technophobia and sexuality explored with regard to that specific characterization of online users Author Lauren Rosewarne PhD supplies a highly interdisciplinary perspective that draws on research and theories from a range of fields psychology sociology and communications studies as well as feminist theory film theory political science and philosophy to analyze what these stereotypes mean in the context of broader social and cultural issues From cyberbullies to chronically masturbating porn addicts to desperate online daters readers will see the paradox in popular culture's message that while Internet use is universal actual Internet users are somehow subpar less desirable less cool less friendly than everybody else *Intimacy on the Internet* Lauren Rosewarne, 2016-04-14 The focus of this book is on the media representations of the use of the Internet in seeking intimate connections be it a committed relationship a hook up or a community in which to dabble in fringe sexual practices Popular culture film narrative television the news media and advertising present two very distinct pictures of the use of the Internet as related to intimacy From news reports about victims of online dating to the presentation of the desperate and dateless the perverts and the deviants a distinct frame for the intimacy Internet connection is negativity In some examples however a changing picture is emerging The ubiquitousness of Internet use today has meant a slow increase in comparatively more positive representations of successful online romances in the news resulting in more positive spin advertising and a more even handed presence of such liaisons in narrative television and film Both the positive and the negative media representations are categorised and analysed in this book to explore what they reveal about the intersection of gender sexuality technology and the changing mores regarding intimacy Computers in Guidance, Counseling, and Psychotherapy Harry P. Bluhm, 1988 **Making Computers People-Literate** Elaine Weiss, 1993 Weiss illustrates how to facilitate good performance by correcting problems facing computer users moving around the system getting good explanations about how things work and communicating with the system Anyone who is responsible for the performance of computer users will learn to improve human performance by improving interactions between people and computers Sample
