Software Process Improvement Concepts And Practices:

Software Process Improvement Eugene McGuire, 1999-01-01 Software Process Improvement SPI efforts are being undertaken by organizations of all types and sizes as they attempt to deal with the challenges of quality complexity and competitiveness Software process improvement efforts rely on the successful integration of many technical organizational and methodological issues SPI has provided a rich field for both conceptual and practical research in industry and academia Software Process Improvement Concepts and Practices provides the opportunity for rich socio technical and interdisciplinary studies in addition to those studies that primarily focus on process and or enabling technology issues This book addresses numerous aspects of SPI program development implementation trends opportunities and future challenges in organizations

Software Process Improvement for Small and Medium Enterprises: Techniques and Case Studies Oktaba, Hanna, Piattini, Mario, 2008-04-30 Software engineering is of major importance to all enterprises however the key areas of software quality and software process improvement standards and models are currently geared toward large organizations where most software organizations are small and medium enterprises Software Process Improvement for Small and Medium Enterprises Techniques and Case Studies offers practical and useful guidelines models and techniques for improving software processes and products for small and medium enterprises utilizing the authoritative demonstrative tools of case studies and lessons learned to provide academics scholars and practitioners with an invaluable research source *Software Process*

Improvement and Capability Determination Rory O'Connor, Terry Rout, Fergal McCaffery, Alec Dorling, 2011-05-20 This book constitutes the refereed proceedings of the 11th International Conference on Software Process Improvement and Capability Determination SPICE 2011 held in Dublin Ireland in May June 2011 The 15 revised full papers presented and 15 short papers were carefully reviewed and selected from numerous submissions The papers are organized in topical sections on process modelling and assessment safety and security medi SPICE high maturity implementation and improvement **Software**

Process Definition and Management Jürgen Münch, Ove Armbrust, Martin Kowalczyk, Martín Soto, 2012-05-27 The concept of processes is at the heart of software and systems engineering Software process models integrate software engineering methods and techniques and are the basis for managing large scale software and IT projects High product quality routinely results from high process quality Software process management deals with getting and maintaining control over processes and their evolution Becoming acquainted with existing software process models is not enough though It is important to understand how to select define manage deploy evaluate and systematically evolve software process models so that they suitably address the problems applications and environments to which they are applied Providing basic knowledge for these important tasks is the main goal of this textbook Münch and his co authors aim at providing knowledge that enables readers to develop useful process models that are suitable for their own purposes They start with the basic concepts Subsequently existing representative process models are introduced followed by a description of how to create individual models and the

necessary means for doing so i.e notations and tools Lastly different possible usage scenarios for process management are highlighted e.g process improvement and software process simulation Their book is aimed at students and researchers working on software project management software quality assurance and software measurement and at practitioners who are interested in process definition and management for developing maintaining and operating software intensive systems and services

Product-Focused Software Process Improvement Michael Felderer, Daniel Méndez Fernández, Burak Turhan, Marcos Kalinowski, Federica Sarro, Dietmar Winkler, 2017-11-10 This book constitutes the refereed proceedings of the 18th International Conference on Product Focused Software Process Improvement PROFES 2017 held in Innsbruck Austria in November December 2017 The 17 revised full papers presented together with 10 short papers 21 workshop papers 3 posters and tool demonstrations papers and 4 tutorials were carefully reviewed and selected from 72 submissions The papers are organized in topical sections on Agile software Development Data science and analytics Software engineering processes and frameworks Industry relevant qualitative research User and value centric approaches Software startups Serum Software testing

Modern Software Engineering Concepts and Practices: Advanced Approaches Dogru, Ali H., Biçer, Veli, 2010-12-31 Software engineering has advanced rapidly in recent years in parallel with the complexity and scale of software systems New requirements in software systems yield innovative approaches that are developed either through introducing new paradigms or extending the capabilities of well established approaches Modern Software Engineering Concepts and Practices Advanced Approaches provides emerging theoretical approaches and their practices This book includes case studies and real world practices and presents a range of advanced approaches to reflect various perspectives in the discipline

Product Focused Software Process Improvement Frank Bomarius, Markku Oivo, 2000-06-07 This book constitutes the refereed proceedings of the Second International Conference on Product Focused Software Process Improvement PROFES 2000 held in Oulu Finland in June 2000 The 30 revised full papers presented were carefully reviewed and selected from a total of 60 submitted full papers The book is divided into topical sections on process improvement empirical software engineering industrial experiences methods and tools software process and modeling software and process measurement and organizational learning and experience factory

Systems Engineering for Business Process Change Peter Henderson, 2012-12-06 A very large proportion of commercial and industrial concerns in the UK find their business competitiveness dependent on huge quantities of already installed legacy IT Often the nature of their business is such that to remain competitive they have to be able to change their business processes Sometimes the required change is radical and revolutionary but more often the required change is incremental For such incremental change a major systems engineering problem arises The cost and delay involved in changing the installed IT to meet the changed business requirements is much too high In order to address this issue the UK Engineering and Physical Science Research Council EPSRC set up in 1996 a managed research programme entitled Systems Engineering for Business Process Change SEBPC I was appointed as co ordinator of the programme The

overall aim of this new managed research programme was to release the full potential of IT as an enabler of business process change and to overcome the disabling effects which the build up of legacy systems has on such change As such this aim addressed a stated objective of the Information Technology and Computer Science IT CS part of EPSRC to encourage research at a system level *Software Process Improvement* Ita Richardson, Per Runeson, Richard Messnarz, 2006-10-13 This book constitutes the refereed proceeding of the 13th European Software Process Improvement Conference EuroSPI 2006 held in Joensuu Finland in October 2006 The 18 revised full papers presented were carefully reviewed and selected from 62 submissions **Product-Focused Software Process Improvement** Jürgen Münch, 2007-06-21 This book constitutes the refereed proceedings of the 8th International Conference on Product Focused Software Process Improvement PROFES 2007 held in Riga Latvia in July 2007 The 29 revised full papers presented together with 4 reports on workshops and tutorials and 4 keynote addresses were carefully reviewed and selected from 55 submissions The papers constitute a balanced mix of academic and industrial aspects they are organized in topical sections on global software development software process improvement software process modeling and evolution industrial experiences agile software development software measurement simulation and decision support processes and methods
