Soil Management And Smallholder Development In The Pacific Islands:

Soil Management and Smallholder Development in the Pacific Islands E. Pushparajah, 1989 **The Pacific Islands** Moshe Rapaport, 2013-05-31 The Pacific is the last major world region to be discovered by humans Although small in total land area its numerous islands and archipelagoes with their startlingly diverse habitats and biotas extend across a third of the globe This revised edition of a popular text explores the diverse landforms climates and ecosystems of the Pacific island region Multiple chapters written by leading specialists cover the environment history culture population and economy The work includes new or completely revised chapters on gender music logging development education urbanization health ocean resources and tourism Throughout two key issues are addressed the exceptional environmental challenges and the demographic economic political challenges facing the region Although modern technology and media and waves of continental tourists are fast eroding island cultures the continuing resilience of Pacific island populations is apparent This is the only contemporary text on the Pacific Islands that covers both environment and sociocultural issues and will thus be indispensable for any serious student of the region Unlike other reviews it treats the entirety of Oceania with the exception of Australia and is well illustrated with numerous photos and maps including a regional atlas Contributors David Abbott Dennis A Ahlburg Glenn Banks John Barker Geoffrey Bertram David A Chappell William C Clarke John Connell Ron Crocombe Julie Cupples Derrick Depledge Colin Filer Gerard J Fryer Patricia Fryer Brenden S Holland E Alison Kay David M Kennedy Lamont Lindstrom Rick Lumpkin Harley I Manner Selina Tusitala Marsh Nancy McDowell Hamish A McGowan Frank McShane Simon Milne R John Morrison Dieter Mueller Dombois Stephen G Nelson Patrick D Nunn Michael R Ogden Andrew Pawley Jean Louis Rallu Vina Ram Bidesi Moshe Rapaport Annette Sachs Robertson Richard Scaglione Donovan Storey Andrew P Sturman Lynne D Talley James P Terry Randolph R Thaman Frank R Thomas Caroline Vercoe Terence Wesley Smith Paul Wolfram **Science of Pacific Island Peoples: Land use and agriculture** R. Latt, 2013-04-18 Large areas of the warm humid tropics in Southeast Asia the Pacific Latin America the Caribbean and Africa are hilly or mountainous Jackson and Scherr 1995 estimate that these tropical hillside areas are inhabited by 500 million people or one tenth of the current world population many of whom practice subsistence agriculture The region most affected is Asia which has the lowest area of arable land per capita Aside from limited areas of irrigated terraces most of the sloping land which constitutes 60% to 90% of the land resources in many Southeast Asian countries has been bypassed in the economic development of the region Maglino and Hashim 1993 Poverty in these areas is often high in contrast to the relative wealth of irrigated rice farms in lowland areas that benefited from the green revolution Rapid population growth in some countries is also exacerbating the problems of hillside areas Increasingly people are migrating from high potential lowland areas where land is scarce to more remote hillside areas Such migration together with inherent high population

growth is forcing a transformation in land use from subsistence to permanent agriculture on fragile slopes and is creating a new suite of social economic and environmental problems Garritty 1993 Maglinao and Hashim 1993 Contaminants and the Soil Environment in the Australasia-Pacific Region R.
