Bruijnzeel,2009-12-17 *Forests Water and People in the Humid Tropics* is a comprehensive review of the hydrological and physiological functioning of tropical rain forests the environmental impacts of their disturbance and conversion to other land uses and optimum strategies for managing them The book brings together leading specialists in such diverse fields as tropical anthropology and human geography environmental economics climatology and meteorology hydrology geomorphology plant and aquatic ecology forestry and conservation agronomy The editors have supplemented the individual contributions with invaluable overviews of the main sections and provide key pointers for future research Specialists will find authenticated detail in chapters written by experts on a whole range of people water land use issues managers and practitioners will learn more about the implications of ongoing and planned forest conversion while scientists and students will appreciate a unique review of the literature

Pasoh T. Okuda,N. Manokaran,Y. Matsumoto,K. Niiyama,S.C. Thomas,P.S. Ashton,2013-06-29 The Pasoh Forest Reserve pasoh FR has been a leading center for international field research in the Asian tropical forest since the 1970s when a joint research project was carried out by Japanese British and Malaysian research teams with the cooperation of the University of Malaya UM and the Forest Research Institute FRI

now the Forest Research Institute Malaysia FRIM under the International Biological Program IBP The main objective of the project was to provide basic information on the primary productivity of the tropical rain forest which was thought to be the most productive of the world's ecosystems After the IBP project a collaborative program between the University of Malaya and the University of Aberdeen Scotland UK for post graduate training was carried out at Pasoh Reproductive biology of some dipterocarp trees featured in many of the findings arrived at through the program contributing greatly to progress in the population genetics of rain forest trees Since those research programs apart of the Pasoh forest and its field research station have been managed by FRIM In 1984 FRIM started a long term ecological research program in Pasoh FR with the Smithsonian Tropical Research Institute STRI and Harvard University establishing a 50 ha plot and enumerating and mapping all trees 1 cm or more in diameter at breast height A census has been conducted every 5 years The Management of Industrial Forest Plantations José G. Borges, Luis Diaz-Balteiro, Marc E. McDill, Luiz C.E.

Rodriguez, 2014-09-01 The Management of Industrial Forest Plantations Theoretical Foundations and Applications provides a synthesis of current knowledge about industrial forestry management planning processes It covers components of the forest supply chain ranging from modelling techniques to management planning approaches and information and communication technology support It may provide effective support to education research and outreach activities that focus on forest industrial plantations management It may contribute further to support forest managers when developing industrial plantations management plans The book includes the discussion of applications in 26 Management Planning in Actions boxes These applications highlight the linkage between theory and practice and the contribution of models methods and management planning approaches to the efficiency and the effectiveness of industrial plantations management planning

Tropical Agroecosystems John H. Vandermeer, 2002-12-03 Tropical areas present ecological cultural and political problems that demand analysis that is distinct from general ecological analysis The tropical environment is special in many ways from the lack of a biological down season winter to generally poor soil conditions to a reliance on traditional methods of agriculture in an undeveloped society Presenting a broad range of approaches to agroecosystem analysis this book addresses specific ecological issues associated with agricultural production examines two case studies of agricultural transformation and its effect on biodiversity and discusses key landscape relationships between agroecosystems wildlife and human disease

Global Change and Forest Soils, 2019-11-23 Global Change and Forest Soils Cultivating Stewardship of a Finite Natural Resource Volume 36 provides a state of the science summary and synthesis of global forest soils that identifies concerns issues and opportunities for soil adaptation and mitigation as external pressures from global changes arise Where how and why some soils are resilient to global change while others are at risk is explored as are upcoming train wrecks and success stories across boreal temperate and tropical forests Each chapter offers multiple sections written by leading soil scientists who comment on wildfires climate change and forest harvesting effects while also introducing examples of current global

issues Readers will find this book to be an integrated up to date assessment on global forest soils Presents sections on boreal temperate and tropical soils for a diverse audience Serves as an important reference source for anyone interested in both a big picture assessment of global soil issues and an in depth examination of specific environmental topics Provides a unique synthesis of forest soils and their collective ability to respond to global change Offers chapters written by leading soil scientists Prepares readers to meet the daily challenges of drafting multi resource environmental science and policy documents

The Archaeology of Human-Environment Interactions Daniel Contreras, 2016-08-25 The impacts of climate change on human societies and the roles those societies themselves play in altering their environments appear in headlines more and more as concern over modern global climate change intensifies Increasingly archaeologists and paleoenvironmental scientists are looking to evidence from the human past to shed light on the processes which link environmental and cultural change Establishing clear contemporaneity and correlation and then moving beyond correlation to causation remains as much a theoretical task as a methodological one This book addresses this challenge by exploring new approaches to human environment dynamics and confronting the key task of constructing arguments that can link the two in concrete and detailed ways The contributors include researchers working in a wide variety of regions and time periods including Mesoamerica Mongolia East Africa the Amazon Basin and the Island Pacific among others Using methodological vignettes from their own research the contributors explore diverse approaches to human environment dynamics illustrating the manifold nature of the subject and suggesting a wide variety of strategies for approaching it This book will be of interest to researchers and scholars in Archaeology Paleoenvironmental Science Ecology and Geology

Gradients in a Tropical Mountain Ecosystem of Ecuador Erwin Beck, Jörg Bendix, Ingrid Kottke, Franz Makeschin, Reinhard Mosandl, 2008-01-24 A fascinating work that provides a wealth of information on one of the world s most biodiverse ecosystems This is the result of investigations by almost 30 groups of researchers from various disciplines They performed ecosystem analyses following two gradients an altitudinal gradient and a gradient of land use intensity and ecosystem regeneration following human use Based on these analyses this volume discusses these findings in a huge variety of subject areas
