Solaria Binaria:

Solaria Binaria Alfred De Grazia, 2018-03-17 Let's think of the possibility of another history for the solar system making it a short one positing the Sun as one time partner in a binary star system this was the challenge that Earl Milton and Alfred de Grazia set to themselves when they got to work on Solaria Binaria The dynamic model which they came up with is electromagnetic non gravitational and requires only a million years for the life time of the binary Comparative and logical analysis argues not only a recent origin of the binary but also the disruption of the binary beginning at a time when self aware humans emerged Hence early myths and legends and also fragments of ancient history are found to support expectations about the natural behavior of the binary system The speed of astrophysical geological and biological processes is so great that a concept of rapid sudden comprehensive change is preferred the concept of quantavolution *Ancient History: a Revised Chronology* Anthony Lyle, 2012-05-29 This book is a culmination of that research After trashing his work 10 times and starting over he managed to get a revised chronology that seemed to be more accurate than that being put out by the status quo universities It combines secular world history with Biblical history in a far more even and smoother match than that proposed by former historians who have attempted the same This is his version 12 which doesn't try to match different histories based on dates but rather by matching people and events and then applying revised dates to those events and people This work will call into question the conclusions of historians of the last 200 years about the ancient periods of time and provide an alternative dating for those times It is a World History in that it incorporates the ancient history of India China Japan as well as the traditional Middle Eastern and European societies of ancient times It re evaluates the beginnings of civilization and the solar system refuting common historical and scientific beliefs of the modern world Documents that have previously been written off as Mythology have been re evaluated as well as they give a different perspective of ancient times and what happened back then The use and creation of calendars is an important feature added to this work which is seldom taken into account by modern histories Incorporated in this work are many of the more recent archaeological finds that have yet to be incorporated in status quo works and institutions He makes no apology for the fact that this is Biblically based and the conclusions that have been reached by this work fit very well in Biblical contexts and adds some understanding to the events that took place in the Biblical narratives **Beyond Velikovsky** Henry H. Bauer, 1999 Since the appearance in 1950 of *Worlds in Collision* Immanuel Velikovsky's radical theories of planetary physics have been the center of controversy This book presents an analysis of the Velikovsky affair resolves the misunderstandings and arguments between opposing camps and leads us to an understanding of the scientific process itself *On the Origin of Myths in Catastrophic Experience, vol. 1: Preliminaries* Marinus Anthony van der Sluijs, 2019-01-01 Creation myths around the world reveal an intricate network of recurrent motifs Many of these are counterintuitive and not widely known describing a time when the sky was low the stars did not yet shine multiple suns appeared the moon was brighter than the sun no land existed deities and mortals maintained

frequent contact a world axis in the form of a tree ladder or giant man connected the earth with the sky a devastating flood or fire ended the old order and so forth The present work in multiple volumes aims to find an origin for this cross culturally and internally consistent body of traditions in a series of extraordinary natural events relating especially to the earth's transition from the last glacial period to the Holocene This first volume sets the stage for the interdisciplinary hypothesis Essential lines of research receive a historical introduction comparative mythology catastrophism and the study of the mythical world axis in relation to the earth's rotation Various astronomical and meteorological interpretations that are not strictly catastrophist are explored for several types of myths about the sun the moon and the world axis but leave many of the most intriguing traditions unexplained It is argued that a structural core of the worldwide mythology of creation and destruction in which the cosmic axis takes pride of place points to a specific period of dramatic natural circumstances in real prehistoric time A new synopsis is provided of this universal mythological substrate It emerges that the mythical world axis cannot have been based on a single object seen or imagined at one of the poles as has usually been supposed This surprising conclusion paves the way for the innovative geomagnetic theory proposed in volume 2

Chaos and Creation Alfred De Grazia, 1981 Forbidden Archeology's Impact Michael A. Cremo, 1998 Examines the impact of the author's controversial 1993 book *Forbidden Archaeology* on the scientific community *The Worldwide List of Alternative Theories and Critics* Jean de Climont, 2020-11-01 This Worldwide List of Alternative Theories and Critics only available in english language includes scientists involved in scientific fields The 2023 issue of this directory includes the scientists found in the Internet The scientists of the directory are only those involved in physics natural philosophy The list includes 9700 names of scientists doctors or diploma engineers for more than 70% Their position is shortly presented together with their proposed alternative theory when applicable There are nearly 3500 authors of such theories all amazingly very different from one another The main categories of theories are presented in an other book of Jean de Climont **THE ALTERNATIVE THEORIES** The Taste of War Alfred De Grazia, 1992 **Homo Schizo: Human nature and behavior** Alfred De Grazia, 1983 **Homo Schizo: Human and cultural hogenesis** Alfred De Grazia, 1983
