Soldiers of Fortune James C. Mulvenon, 2001 Phase One Organization and Strategy Phase Two Formal Registration and Asset Valuation Phase Three The Real Bargaining Begins Exempted from Divestiture PLA Telecoms Ending the Second Phase A Difficult Transition Divestiture Problems Resource Allocation and Discipline Conclusion Appendix A PLA Factories Appendix B PLA Bottlers and Breweries Appendix C Divestiture Chronology Notes Bibliography Index *Soldiers of Fortune: The Rise and Fall of the Chinese Military-Business Complex, 1978-1998* James C. Mulvenon, 2016-07-08 In 1978 faced with the pressure to modernize and a declining budget the Chinese People's Liberation Army PLA reluctantly agreed to join China's economic reform drive expanding its internal economy to market oriented civilian production This work examines PLA's role in the economy up to 1998 **Wealth Into Power** Bruce J. Dickson, 2008-07-14 Dickson argues that rather than promoting democratization China's entrepreneurs offer key support for the Communist Party's agenda

Dictatorship and Information Martin K. Dimitrov, 2023 Fear pervades dictatorial regimes Citizens fear leaders the regime's agents fear superiors and leaders fear the masses The ubiquity of fear in such regimes gives rise to the dictator's dilemma where autocrats do not know the level of opposition they face and cannot effectively neutralize domestic threats to their rule The dilemma has led scholars to believe that autocracies are likely to be short lived Yet some autocracies have found ways to mitigate the dictator's dilemma As Martin K Dimitrov shows in *Dictatorship and Information* substantial variability exists in the survival of nondemocratic regimes with single party polities having the longest average duration Offering a systematic theory of the institutional solutions to the dictator's dilemma Dimitrov argues that single party autocracies have fostered channels that allow for the confidential vertical transmission of information while also solving the problems associated with distorted information To explain how this all works Dimitrov focuses on communist regimes which have the longest average lifespan among single party autocracies and have developed the most sophisticated information gathering institutions Communist regimes face a variety of threats but the main one is the masses Dimitrov therefore examines the origins evolution and internal logic of the information collection ecosystem established by communist states to monitor popular dissent Drawing from a rich base of evidence across multiple communist regimes and nearly 100 interviews Dimitrov reshapes our understanding of how autocrats learn or fail to learn about the societies they rule and how they maintain or lose power The Lessons of History: The Chinese People's Liberation Army at 75, *The Chinese Army Today* Dennis J. Blasko, 2013-06-17 *The Chinese Army Today* is a comprehensive study of the Chinese military examining its ground forces in a level of detail not found in any other contemporary works This new revised edition has been fully updated to take account of recent changes in the institution In 1999 the military modernization program of the Chinese People's Liberation Army increased in intensity and achieved a focus not seen in the previous two decades Based primarily on actual Chinese sources this book details these changes and puts them in the context of the many traditions that still remain Written by a retired

Chinese National Security Decisionmaking Under Stress Andrew Scobell,2005 If there is one constant in expert analyses of the history of modern China it is the characterization of a country perpetually in the throes of crises While China at the mid point of the Twenty first Century s first decade is arguably the most secure and stable it has been in more than a century crises continue to emerge with apparent frequency Consequently the study of china s behavior in conditions of tension and stress is of considerable importance to policy makers and analysts around the world

Cold Rivals Evan S. Medeiros,2023 Cold Rivals brings together a distinguished group of scholars from the United States and China to examine the new era of strategic competition in US China relations The two countries are now competitors locked in a long term rivalry but how volatile the rivalry will become is still to be determined The book explores not only the historical roots and contemporary foreign policy aspects of this era but the volume also looks at the economic military and technological arenas of US China strategic competition In doing so this volume highlights important differences in US and Chinese perspectives A final section of the volume explores future scenarios for the relationship from different perspectives but with all of them coming to the sobering conclusion about a future marked by expanding differences growing tensions economic disengagement and pressures for a global competition This policy relevant book provides a comprehensive overview of US China strategic competition and reinvigorates thinking about how to avoid reaching a crisis point

China's Military Procurement in the Reform Era Yoram Evron,2015-06-26 The decisions that shape the policy of weapons procurement are an important area of national security policy This is all the more true for China which during recent decades has vacillated between different sources and directions of military build up This book explores the politics of military procurement in China under the successive leaderships of Deng Xiaoping Jiang Zemin and Hu Jintao It shows how China s political and military leaders have sought to adjust military procurement policy to meet China s strategic objectives to relate it to non military needs to strike a balance between the import of weapons and indigenous production and to determine the connections between hardware and other components of military power Exploring in detail five major shifts in the nation s military procurement it traces the considerations and negotiations among China s civilian and military leaderships By doing so it offers both a conceptual framework and empirical grounds for evaluating the factors that shape China s military procurement directions as well as their limitations prospects and operational implications As the first book to study comprehensively and systematically the attributes shaping China s military procurement it will be of great interest to students and scholars of
