Solid Gold Success Strategies For Your Business:

Solid Gold Success Strategies for Your Business Donald D. Taylor, 1996 This text offers syndicated columnist Don Taylor's homespun parables, horse sense and tales of triumph gained while travelling and consulting across the US. It covers a range of topics including how to improve business relationships, generate effective advertising and free publicity, track and analyze financial information, understand the difference between strategic planning and operational planning, deliver customer service and weed out the onerous customers that can drain a business and start a new business without tripping up on the pitfalls.

Establishing a Successful Business Rich Brott, 2009 Author Rich Brott notes six themes that are mutually dependent upon each other, each of which represent a necessary requirement for a successful business. They are Knowledge, Experience, Ability, Opportunity, Capital and Commitment. When it comes to business failures, the stats are not pretty. Within the first year of operation, over 50% of businesses fail. Extend the time period to five years and the statistics become even worse. In that time period, over 95% of all businesses fail. From the beginning, business is risky and chances of success poor. But you can significantly improve your chances of success with good insight, preparation and planning. The author notes that in this book, he wants to help you in the area of establishing your business and will do so by leading you step by step through these critical areas.

Developing a Successful Personal & Business Vision Rich Brott, 2009 Dreams worth pursuing do not have to be spectacular or amazing. The important thing is living a dream that is really yours. Those who are most fulfilled know what they want and go after it. Understanding and shaping vision is the basis for any new or existing personal or business career. Vision development is a process. But first, it seems appropriate to ask some questions: Why are you here? What is your personal purpose in life? Why are you doing what you are doing? What brought you to this profession? Why are you where you are? These are all questions you must ask yourself before developing a successful personal vision. They same holds true when it comes to a business vision. Understanding who you are and what you are all about is pertinent to understanding what it is you want to accomplish.

Advancing a Successful Business Rich Brott, 2009 Business focus is an integral part of your ability to advance and build your business into something beyond mediocrity. Staying focused on your vision and purpose is very key. Nothing significant is ever achieved without focus. If it's worth getting, it must be the focus of your attention at all times. Focus begins with a sense of purpose, mission and vision. This is your sense of direction, your road map, your life track for the business. It's where you are headed. A growing company does not continue without great business productivity, timely follow through and effective leadership. Advancing a Successful Business is not automatic and will not happen without a steady hand at the helm, backed by a great team who stays alert and motivated.

Up Against the Wal-Marts Donald D. Taylor, Jeanne Smalling Archer, 1996 No matter how large the shadow of the mass merchandisers may loom, this book shows small business owners how to turn their knowledge into market share using a potent arsenal of strategies, tips and advice to combat price cutting, regain customer focus and identify and seize profitable niches.
