Solidarity In Europe The History Of An Idea:

Solidarity in Europe Steinar Stjernø, 2005 Steinar Stjernø examines the concept of solidarity in European politics tracing its use by social theorists and politicians since the nineteenth century This unique book systematically compares the many different conceptions of this central political idea held by Europeans over the past two centuries *The Routledge Handbook of Philosophy and Europe* Darian Meacham, Nicolas de Warren, 2021-03-31 Understood historically culturally politically geographically or philosophically the idea of Europe and notion of European identity conjure up as much controversy as consensus The mapping of the relation between ideas of Europe and their philosophical articulation and contestation has never benefitted from clear boundaries and if it is to retain its relevance to the challenges now facing the world it must become an evolving conceptual landscape of critical reflection The Routledge Handbook of Philosophy and Europe provides an outstanding reference work for the exploration of Europe in its manifold conceptions narratives institutions and values Comprising twenty seven chapters by a group of international contributors the Handbook is divided into three parts Europe of the philosophers Concepts and controversies Debates and horizons Essential reading for students and researchers in philosophy politics and European studies the Handbook will also be of interest to those in related disciplines such as sociology religion and European history and history of ideas Revisiting European Security Hatice Yazgan, Sühal Şemşit, 2020-09-29 The EU is currently facing multiple crises ranging from democratic backsliding to migration and its so called rule based order is challenged by both internal and international circumstances Nevertheless the EU is an evolving international actor and despite the shortfalls it has provoked the hopes of being a normative international actor which defends multilateralism and rule based order This edited volume re examines the EU as an international actor and power in the context of recent challenges both in the EU and in international politics and addresses the following questions Does the EU make a difference in various regions and issue areas Is it influential and visible What kind of a power is the EU regarding these regions How is the EU perceived by other powers What are the main threats perceived by the EU and how will the EU address these threats How will the EU defend its values under current circumstances This research focuses on the migration and asylum policies of the EU as a key area and examines the EU's role as an international actor in neighbouring regions and in Africa and China The book provides a context in current international circumstances and will be useful for students and practitioners *Fascists of the World, Unite?* Martin Kristoffer Hamre, 2025-08-04 This book analyzes the ideas and forms of international cooperation between Fascist Italy Nazi Germany and fascist movements from Denmark Norway Sweden Switzerland Ireland and Britain The study examines how fascists attempted to unite across borders by forming international organizations and networks hosting conferences and exhibitions disseminating multilingual publications and exchanging propaganda Their transnational cooperation was fuelled by shared ideas of ultranationalism anti liberalism anti communism antisemitism racism white supremacism and Europeanism The book argues that fascist

internationalism marked by contradictions limitations and an Italo German rivalry emerged in the 1930s as a counter reaction to liberal and communist internationalism The epilogue discusses reverberations in the Second World War and the postwar period and outlines the relevance of this history for understanding contemporary forms of far right internationalism

The Law of EU Border Controls Leandro Mancano, 2025-11-18 The law of EU border controls is diverse and dynamic involving multiple governance levels with distinct objectives It addresses various control subjects through a mix of soft and hard law sources Dr Leandro Mancano evaluates how this diversity affects the constitutional compliance of EU border controls and explores the conditions necessary for the EU to remain an area without internal frontiers By providing a comprehensive analysis of both external and internal border controls and offering insights into the laws and practices of specific member states this research addresses how to effectively manage or overcome the challenges posed by this heterogeneity within the EU legal framework Ultimately *The Law of EU Border Controls Constitutional Compliance and Conditions for an Area without Internal Frontiers* highlights the impact of European integration on national sovereignty and enhances the understanding of EU border law as part of the unique EU legal system It is an essential resource for academics and practitioners interested in migration and asylum law

European Yearbook of Constitutional Law 2022 Jurgen de Poorter, Gerhard van der Schyff, Maarten Stremmer, Maartje De Visser, Ingrid Leijten, Charlotte van Oirsouw, 2023-07-25 The European Yearbook of Constitutional Law EYCL is an annual publication devoted to the study of constitutional law It aims to provide a forum for in depth analysis and discussion of new developments in the field both in Europe and beyond This fourth volume of the EYCL addresses the underexplored and contentious topic of whether the EU possesses a constitutional identity of its own To date the main focus of scholarship and case law concerns the constitutional identities of the Member States of the EU This is because the EU has to respect such identities according to article 4 2 TEU The attention for Member States constitutional identities stands in stark contrast to the notion of an EU constitutional identity Such an identity features very little in the literature and debate on constitutional identity and the legal architecture of the EU Consequently this edition of the EYCL addresses the gap in legal research by studying constitutional identity with a focus on the EU itself The book explores various views on whether the EU possesses such an identity and what any possible identity might entail In this way a fuller and more inclusive picture can be formed of constitutional identity as it relates to the multilevel constitutional order inhabited by the EU and its Member States This volume will be of special interest to constitutional and legal scholars who are interested in EU and national constitutional law as well as to political scientists In addition the book is relevant for judges government officials judges and policy makers who work with EU constitutional law and its relationship with national constitutional law Jurgen de Poorter is State Councillor at the Dutch Council of State and professor at Tilburg Law School Department of Public Law and Governance Gerhard van der Schyff is associate professor at Tilburg Law School Department of Public Law and Governance Maarten Stremmer is assistant professor at Maastricht University Faculty of Law Department

of Public Law Maartje De Visser is associate professor at SMU School of Law Singapore Ingrid Leijten is professor at Tilburg Law School Department of Public Law and Governance Charlotte van Oirsouw is PhD researcher at Utrecht University Department of Constitutional and Administrative Law

A Constitutional Order of States? Anthony Arnall, Catherine Barnard, Michael Dougan, Eleanor Spaventa, 2011-03-03 This collection celebrates the career of Professor Alan Dashwood a leading member of the generation of British academics who organised explained and analysed what we now call European Union law for the benefit of lawyers trained in the common law tradition It takes as its starting point Professor Dashwood's vivid description of the European Union as a constitutional order of states He intended that phrase to capture the unique character of the Union On the one hand it is a supranational order characterised by its own distinctive institutional dynamics and an unprecedented level of cohesion among and penetration into the national legal systems On the other hand it remains an organisation of derived powers the Member States retaining their character as sovereign entities under international law This theme permeates both the constitutional and the substantive law of the Union Contributors to the collection include members of the judiciary and distinguished practitioners officials and academics They consider the foundations strengths implications and shortcomings of this conceptual framework in various fields of EU law and policy The collection is an essential purchase for anyone interested in the constitutional framework of the contemporary European Union

EU Health Systems and Distributive Justice Danielle Da Costa Leite Borges, 2016-07-01 EU Health Systems and Distributive Justice uses theories of distributive justice to examine tensions created by the application of the Internal Market rules to the provision of health care services within the European Union Using the concepts and principles embedded in the theories of egalitarianism and libertarianism this book analyses the impact of the Internal Market rules on common values and principles shared by European health systems such as universality accessibility equity and solidarity This analysis is conducted using the specific issue of cross border health care This book makes innovative contributions to the study of the relationship between EU health systems and the Internal Market it encompasses the analysis of all principles recognised by EU institutions as guiding principles of European health systems it integrates human rights law and practice into the discussion of the EU Court of Justice's approach to patient mobility cases and it assesses the potential impact of the Internal Market over EU health systems through the lens of distributive justice looking at the underlying principles of these systems that are mostly concerned with social justice Ultimately this is not a book on EU law and health care but it is a book on distributive justice health care and the principles and policies guiding European health systems

Reconsidering Europeanization Florian Greiner, Peter Pichler, Jan Vermeiren, 2022-08-01 This pertinent and highly original volume explores how ideas of Europe and processes of continental political socio economic and cultural integration have been intertwined since the nineteenth century Applying a wider definition of Europeanization in the sense of becoming European it will pay equal attention to counter processes of disentanglement and disintegration that have accompanied slowed down or displaced such

trends and developments By focusing on the practices agents and experience of Europeanization the volume strives to bring together the history of ideas and the history of human actions and conduct two approaches that are usually treated separately in the field of European studies *The European Heritage* Gerard Delanty, 2017-07-06 Gerard Delanty offers a critical interpretation of the European heritage today in light of recent developments in the human and social sciences and in view of a mood of crisis in Europe that compels us to re think the European past One of the main insights informing this book is that a transnational and global perspective on European history can reorient the European heritage in a direction that offers a more viable way for contemporary Europe to articulate an intercultural identity in keeping with the emerging shape of Europe and with its own often acknowledged past He argues that the European heritage is based less on a universalistic conception of culture than on a plurality of interconnecting narratives Such a perspective opens up new directions for scholarship and public debate on heritage that are guided by critical cosmopolitan considerations that highlight contention resistances competition and dissonance He argues that the specificity of the European dimension of culture is in the entanglement of many cultures rather than in an original culture The cultures of Europe are not separated but have been shaped in close interaction with each other and with the non European world Nations are not therefore unique exceptional or fundamentally different from each other The outcome of such intermingling is a multiplicity of ideas of Europe that serve as shared cultural reference points
