## **Solidarity With Victims Toward A Theology Of Social Transformation:**

**Lonergan, Social Transformation, and Sustainable Human Development** Joseph Ogbonnaya, 2013-01-29 Secular contemporary development discourse deals with the problems of societal development and transformation by prioritizing the human good in terms of vital and social values with the aim of providing the basic necessities of life through social institutions that work. While such an approach is profitable by promoting economic growth, it does not take note of other dynamics of social progress and development. Also, it fails to notice the consequences of development strategies on human flourishing, well-being, and happiness. Ogbonnaya argues for an integral approach to development by engaging in a fruitful dialogue between Bernard Lonergan's philosophical anthropology with contemporary development discourse as represented in select theories of development and in select principles of Catholic social teaching. It makes a case for social progress and transformation as emanating from human understanding. Also, it highlights the parts of Lonergan's theory that contribute to an understanding specifically of his treatment of bias and of the shorter and longer cycles of societal decline. In view of the reality of moral impotence and limitations, it considers the reversal of societal decline as possible through the supernatural solution of God's grace.

**From Strength to Strength** Robert London Smith, 2007 Drawing on his experience as a member of the clergy and the questions and concerns that arose in the course of ministering to congregants, Robert London Smith Jr explores exactly what function the black church performs and importantly why. In this provocative work, he argues that much black church praxis is less authentic, relevant, and constructive today because it continues to be implicated by certain values and meanings that are themselves rooted in a historical black thematic universe that is fading and being replaced by a new set of values and meanings located within a contemporary black thematic universe. Using a practical theology method, Smith develops a theological framework context praxis to create an approach to understanding and creating an informed praxis for the black church. He then sets forth a bold project that calls for the critical engagement of black church praxis and what he calls the black thematic universe in its historical and contemporary manifestations. The goal is to transform this praxis so that it remains authentic to the Gospel and the religious traditions and history of those who come to interpret and live out its message in the world while being relevant to the issues and challenges of the present historical context in which the black church lives out its meaning and purpose and constructive for the building up and equipping of the Body of Christ. Smith's creation of a black existential and theological hermeneutic is an approach that moves toward the realization of this ambitious goal. This book challenges many traditional views of black church praxis, including pastoral care, worship, and fellowship, and creates a space for a renewed and much-needed dialogue about the acts of the black church within contemporary America. As such, it is an important text for students of practical theology and African American religion, as well as those interested in developing a critical understanding of the implications of the intersection of faith and culture.
