Chronology and Evolution within the Mesolithic of North-West Europe Philippe Crombé, Joris Sergant, Mark Van Strydonck, 2020-06-12 Since its development in 1949 radiocarbon dating has increasingly been used in prehistoric research in order to get a better grip on the chronology of sites cultures and environmental changes Refinement of the dating sampling and calibration methods has continuously created new and challenging perspectives for absolute dating In these proceedings the focus lies on the contribution of carbon 14 dates in current Mesolithic research in North West Europe Altogether 40 papers dealing with radiocarbon dates from 15 different countries are presented Major themes are the typological technological evolution of lithic and bone industries changes in settlement patterns burial practices demography and subsistence human impact on the Mesolithic environment and the neolithisation process Some papers also deal with more methodological aspects of carbon 14 dating e g calculation of various reservoir effects the use of cumulative calibrated probability distributions and related techniques e g stable isotope analysis for palaeodiet reconstruction

Humans at the End of the Ice Age Lawrence Guy Straus, Berit Valentin Eriksen, Jon M. Erlandson, David R. Yesner, 2012-12-06 Humans at the End of the Ice Age chronicles and explores the significance of the variety of cultural responses to the global environmental changes at the last glacial interglacial boundary Contributions address the nature and consequences of the global climate changes accompanying the end of the Pleistocene epoch detailing the nature speed and magnitude of the human adaptations that culminated in the development of food production in many parts of the world The text is aided by vital maps chronological tables and charts

Ancient Scandinavia T. Douglas Price, 2015-06-12 Scandinavia a land mass comprising the modern countries of Denmark Sweden and Norway was the last part of Europe to be inhabited by humans Not until the end of the last Ice Age when the melting of huge ice sheets left behind a fresh barren land surface about 13 000 BC did the first humans arrive and settle in the region The archaeological record of these prehistoric cultures much of it remarkably preserved in Scandinavia s bogs lakes and fjords has given us a detailed portrait of the evolution of human society at the edge of the inhabitable world In this book distinguished archaeologist T Douglas Price provides a history of Scandinavia from the arrival of the first humans to the end of the Viking period ca AD 1050 The first book of its kind in English in many years Ancient Scandinavia features overviews of each prehistoric epoch followed by illustrative examples from the region s rich archaeology An engrossing and comprehensive picture of change across the millennia emerges showing how human society evolved from small bands of hunter gatherers to large farming communities to the complex warrior cultures of the Bronze and Iron Ages cultures which culminated in the spectacular rise of the Vikings at the end of the prehistoric period The material evidence of these past societies arrowheads from reindeer hunts megalithic tombs rock art beautifully wrought weaponry Viking warships give vivid testimony to the ancient peoples of Scandinavia and to their

Magdalenian aims to provide a comprehensive overview of the archaeological record of this period. It sheds new light on five regional groups between the Rhine valley to the west and the Vistula valley to the east which existed roughly between 20 000 and 14 000 years ago. Readers will discover that these groups are characterized with regard to their environmental setting including faunal and vegetational aspects, lithic raw material and mollusk shell procurement typology, technology and artesian craftworks. The work also explores an alternative interpretation of bidirectional recolonization from both Franco-Cantabria and Eastern Central Europe after the Last Glacial Maximum. This book will appeal to researchers and scholars in archaeology and cognate fields. Investigating Archaeological Cultures Benjamin W. Roberts, Marc Vander Linden, 2011-06-04

Defining culture is an important step in undertaking archaeological research. Any thorough study of a particular culture first has to determine what that culture contains, what particular time period, geographic region and group of people make up that culture. The study of archaeology has many accepted definitions of particular cultures, but recently these accepted definitions have come into question. As archaeologists struggle to define cultures, they also seek to define the components of culture. This volume brings together 21 international case studies to explore the meaning of culture for regions around the globe and periods from the Paleolithic to the Bronze Age and beyond. Taking lessons and overarching themes from these studies, the contributors draw important conclusions about cultural transmission, technology development and cultural development. The result is a comprehensive model for approaching the study of culture, broken down into regions: Russia, Continental Europe, North America, Britain and Africa, materials: Lithics, Ceramics, Metals, and time periods. This work will be valuable to all archaeologists and cultural anthropologists, particularly those studying material culture. **Palaeohistoria**, 1995

Proceedings of the Prehistoric Society Prehistoric Society (London, England), 1997 **Lithic Raw Material Economies in Late Glacial and Early Postglacial Europe** Lynn E. Fisher, Berit Valentin Eriksen, 2002. Lithic assemblages have always been an important source of information, sometimes the only source on human activities in Late Glacial and Early Postglacial Europe. These twelve papers, some of which were given at the 59th Annual SAA meeting in Arnheim in 1994, here revised, present comparative lithic material from across Europe.
