The Late Woodland Period On The Lower Tombigbee River Archaeological Monograph:

The Late Woodland Period on the Lower Tombigbee River George W. Shorter, 1999 Southern Footprints Gregory A. Waselkov, Philip J. Carr, 2024 Southern Footprints celebrates the more than fifty years of research projects carried out by University of South Alabama archaeologists and students as well as staff at the Center for Archaeological Studies in Mobile. Their dynamic work has been public facing through programs and exhibits curated at the University of South Alabama Archaeology Museum. Archaeologists Gregory A. Waselkov, former director of the Center, and Philip J. Carr, current director of the Center, present the greatest hits that have transformed knowledge of human history on the Alabama and Mississippi Gulf Coast from the Ice Age until recently. Of the hundreds of archaeological sites, premiere historic sites such as Old Mobile and Holy Ground are now archaeological preserves. Essays are arranged chronologically overall and survey the history and archaeology of a wide range of significant sites such as the Gulf Shores canoe canal, Bottle Creek Mounds, Old Mobile Fort Mims, Spanish Fort, Spring Hill College, and Mobile River Bridge. Waselkov and Carr take care to acknowledge in these stories populations who are typically underdocumented and recognize the contributions of Native Americans and African Americans as uncovered through archaeology. While documenting all material culture and places that have been saved and preserved, they also note the dire impacts of climate change, environmental disasters, development, and neglect, and share their urgency to protect these areas of shared history. Copious color photographs showcase the archaeology as it unfolded, often with the help of dedicated volunteers. Southern Footprints will serve as an indispensable reference on the rich Gulf heritage for all to appreciate.

Salt in Eastern North America and the Caribbean Ashley A. Dumas, Paul N. Eubanks, 2021-02-09. Case studies examining the archaeological record of an overlooked mineral. Salt, once a highly prized trade commodity essential for human survival, is often overlooked in research because it is invisible in the archaeological record. Salt in Eastern North America and the Caribbean. History and Archaeology brings salt back into archaeology, showing that it was valued as a dietary additive, had curative powers, and was a substance of political power and religious significance for Native Americans. Major salines were embedded in collective memories and oral traditions for thousands of years as places where physical and spiritual needs could be met. Ethnohistoric documents for many Indian cultures describe the uses of and taboos and other beliefs about salt. The volume is organized into two parts: Salt Histories and Salt in Society. Case studies from prehistory to post-Contact and from New York to Jamaica address what techniques were used to make salt, who was responsible for producing it, how it was used, the impact it had on settlement patterns and sociopolitical complexity, and how economies of salt changed after European contact. Noted salt archaeologist Heather McKillop provides commentary to conclude the volume.

Trends and Traditions in Southeastern Zooarchaeology Tanya M. Peres, 2014-02-25. While most works of

southeastern archaeology focus on stone artifacts or ceramics this volume is the first to bring together past and current trends in zooarchaeological studies Faunal reports are often relegated to appendices and not synthesized with the rest of the archaeological data but Trends and Traditions in Southeastern Zooarchaeology calls attention to the diversity of information that faunal remains can reveal about rituals ideologies socio economic organization trade and past environments These essays by leading practitioners in this developing field highlight the differences between the archaeological focus on animals as the food source of their time and the belief among zooarchaeologists that animals represent a far more complex ecology With broad methodological and interpretive analysis of sites throughout the region the essays range in topic from the enduring symbolism of shells for more than 5 000 years to the domesticated dog cemeteries of Spirit Hill in Jackson County Alabama and to the subsistence strategies of Confederate soldiers at the Florence Stockade in South Carolina Ultimately challenging traditional concepts of the roles animals have played in the social and economic development of southeastern cultures this book is a groundbreaking and seminal archaeological study Mississippi Archaeology ,2001 **Late Woodland Societies** Thomas E. Emerson,Dale L. McElrath,Andrew C.
