## **The Leader:**

**The Myth of "The Leader"** Lee Thayer, 2010-11-23 People create and sustain myths to explain what they cannot or do not comprehend They sometimes create myths to make simple what would otherwise strike them as being too complex to bear in mind Thus we have our ancient gods and our contemporary celebrities and the fairy tales that explain them But there is never one cause for what happens no matter how much we might treasure our formulaic myths Anything that happens has many seen and unseen causes Leadership is an ideal example We conceive of our leaders as the cause of how things turn out If things turn out badly we blame them If they turn out well we elevate them to celebrity hood This is fairy tale thinking The hard truth is that our leaders cannot be any more competent in their role than we are in ours Even then our leaders do not control the outcomes We are following a dangerous path in the way we think about our leaders in this culture We need to be able to distinguish between real leaders and counterfeit leaders This book reveals how to do that This book powerfully and insightfully unveils the myth of the leader

Corporate Governance grade 1 7 Heilbronn University language English abstract Women are still significantly underrepresented in Top Management positions and leadership is still associated with the male gender as leadership theories traditionally focus on men This is especially evident in China which has one of the world s highest female labor participation but a female share of only eight percent on the corporate boards Although Chinese women s tertiary educational attainment is now equal to the tertiary education of Chinese men they still face many barriers on their way to the top The strong influence of Confucian values perceiving women as inferior to men remains noticeable until today and women find themselves exposed to a strongly patriarchal business environment As being traditionally the main care givers of their families they are deemed to be expensive potential mothers and thus gender preference can be observed second Classical leadership theories of the Western culture as well as of the Chinese culture are introduced to provide a common understanding of their approaches Further the situation of women in the past and of today is being compared as well as their leadership styles access to managerial leadership positions and the barriers they face Since educational attainment of both genders does not explain why women are rarely found on the upper managerial ranks other reasons that could be a barrier for women s career advancement are examined in this research **Forest and Stream** ,1912 Macmillan's Magazine
