On Learning David Scott,2021-05-20

This is a philosophical work that develops a general theory of ontological objects and object relations It does this by examining concepts as acquired dispositions and then focuses on perhaps the most important of these the concept of learning This concept is important because everything that we know and do in the world is predicated on a prior act of learning A concept can have many meanings and can be used in a number of different ways and this creates difficulty when considering the nature of objects and the relationships between them To enable this David Scott answers a series of questions about concepts in general and the concept of learning in particular Some of these questions are What is learning What different meanings can be given to the notion of learning How does the concept of learning relate to other concepts such as innatism development and progression The book offers a counter argument to empiricist conceptions of learning to the propagation of simple messages about learning knowledge curriculum and assessment and to the denial that values are central to understanding how we live It argues that values permeate everything our descriptions of the world the attempts we make at creating better futures and our relations with other people

Different Schools for a Different World Scott McLeod,Dean Shareski,2017-08-31 This resource details six key arguments for why educators must approach school improvement differently in the 21st century 1 information literacy 2 the economy 3 learning 4 boredom 5 innovation and 6 equity Learn how schools are tackling these six arguments head on in order to help students grow into global citizens critical thinkers innovators and literate content consumers How this book will help you modernize your school culture and increase student success Consider the factors that are preventing students from being successful in the global 21st century world Examine

Achievement and Inclusion in Schools Lani Florian, Martyn Rouse, Kristine Black Hawkins, 2024-11-01 Winner of the nasen Special Educational Needs Academic Book

award 2008 There is an enduring and widespread perception amongst policy makers and practitioners that certain groups of children in particular those who find learning difficult have a detrimental effect on the achievement of other children Challenging this basic assumption Achievement and Inclusion in Schools argues that high levels of inclusion can be entirely compatible with high levels of achievement and that combining the two is not only possible but essential if all children are to have the opportunity to participate fully in education Packed with vivid case studies that explore the benefits and tensions for children and schools this book sets out to answer the following questions What is the nature of the relationship between the inclusion of some children and the achievement of all Are there strategies which can raise the achievement of all children whilst safeguarding the inclusion of others who are more vulnerable What changes can a school make to ensure high levels of inclusion as well as high levels of achievement for all its children Achievement and Inclusion in Schools offers an up to date analysis of current issues provides practical guidance for practitioners and policy makers and will be of interest to anyone passionate about inclusive education
