Education in a Society uncertain of its Values Wolfgang

Brezinka, 2016-06-22 In recent decades the life circumstances of most people around the world have changed enormously We are again expecting scarcity and economic crisis the danger of war terrorism and environmental destruction However people's tendencies toward selfishness and the misuse of freedom uprooting dissoluteness and crime are also increasingly being seen as threats to society and individual citizens The decline of support giving religious worldview and moral traditions has given rise to great uncertainty about values Citizens increasingly experience this as a burden and are becoming more receptive to a reassessment More of us are seeking a new orientation Those responsible for children or youth require this with special urgency because uncertainty in value orientations also creates uncertainty in education Are there ways to escape this dilemma How can we achieve new clarity on the worldview and moral foundations of education To what ends should we direct education With what difficulties should we reckon What tasks must parents fulfil and which should be assigned to teachers These are the topics dealt with in this book It provides answers to the questions of parents teachers and other educators as well as to those of politicians economic leaders and spiritual counsellors It will serve to stimulate thought and contribute to achieving agreement on the central educational tasks of our time

International Handbook of

Lifelong Learning David N. Aspin, Judith Chapman, Michael Hatton, Yukiko Sawano, 2012-12-06 Recent changes in the world effected by the transformations of information technology globalisation and the move towards a knowledge economy over the last thirty years have been as radical and fundamental as the changes resulting from the invention of the wheel and the printing press We are now living in a new age in which the demands are so complex so multifarious and so rapidly changing that the only way in which we shall be able to survive them is by committing to a process of individual communal and global learning throughout the lifespan of all of us A number of international bodies and agencies have taken cognisance of these transformations and the demands they impose upon societies and communities of the twenty first century and have developed and articulated policies intended to enable all citizens of the world in the twenty first century to face these challenges It is now a declared policy of many governments and international agencies that the only vehicle for such preparation is education education education and that preparing for the knowledge economy and the learning society of the

future has to be a lifelong undertaking an investment in the future that is not restricted merely to the domain of economic advancement but also to those of social inclusion and personal growth Realising this policy makers across the international arena are grappling with the need to move from systems that emphasise education and training to the radically more unworked construct of lifelong learning In this volume the editors and authors analyse criticise and rework the ideas principles and theories underpinning policies and programs of lifelong learning re interpreting them in the light of examples of best practice found in a range of educating institutions around the world We believe that students of educational change and community development will find it useful and helpful to have available in this volumesome of the most up to date thinking on the chief concepts theories and values of increasing policy interest in lifelong learning together with a review of some significant examples of the different forms focuses and nexuses of thought and practice on this topic All this enables us to offer some policy recommendations and practical suggestions as to ways forward in the endeavour to make lifelong learning a reality for all

Morrow,Carlos Alberto Torres,1995-03-09 This book summarizes and critiques theories of social and cultural reproduction as they relate to sociology of education *The Age of Learning* Peter Jarvis,2014-06-23 A multidisciplinary analysis of learning in contemporary society It analyzes both the meaning and the place of these strands that make up modern education and offers an overview of the part they play in the work of all educators trainers teachers and course developers **Studies in Modern Childhood** J. Qvortrup,2005-08-05 In this timely study high profile researchers contribute to the burgeoning field of the social studies of childhood with original and often surprising perspectives and approaches They demonstrate that far from being esoteric or negligible childhood is part and parcel of the social fabric in both poor and affluent countries With chapters on children s agency in small worlds and childhood s placement in large scale relationships the book shows not only the variety of childhood s but also suggests that much is common in a generational context **The Learning University** Christopher Duke,1992 *Bulletin of the International Bureau of Education* ,1993 *Recurrent Education and Socioeconomic Success* Albert Tuijnman,1986 Data from the Malmo Sweden longitudinal study were examined for the effects of continuing adult educational attainment and formal schooling on subsequent socioeconomic achievement over the life span of the individual worker The results suggest that acquired level of formal schooling directly influences occupational success and earnings in the early middle and late phases of the career cycle investigated The effect of continuing education attainment on occupational success increases considerably from age 35 to 52 The results do not indicate that continuing education exerts a significant effect on earnings Continuing education may function as a second road to occupational mobility partially independent of acquired level of formal schooling The results generated however do not lend support to the

assumption that recurrent adult education may significantly affect the relative earnings differentials between the various status groups in society Part 1 of this document establishes the theoretical analysis and conceptual frameworks of continuing education Part 2 reviews Swedish developments from 1960 1985 Part 3 describes the aims methodology and findings of the 45 year Malmo study Appendices contain 24 tables and a list of over 300 references is included CML

The Schools We Need E.D. Hirsch, Jr., 2010-02-17 This paperback edition with a new introduction offers a powerful compelling and unassailable argument for reforming America's schooling methods and ideas by one of America's most important educators and author of the bestselling *Cultural Literacy* For over fifty years American schools have operated under the assumption that challenging children academically is unnatural for them that teachers do not need to know the subjects they teach that the learning process should be emphasized over the facts taught All of this is tragically wrong Renowned educator and author E D Hirsch Jr argues that by disdaining content based curricula while favoring abstract and discredited theories of how a child learns the ideas uniformly taught by our schools have done terrible harm to America's students Instead of preparing our children for the highly competitive information based economy in which we now live our schools practices have severely curtailed their ability and desire to learn With an introduction that surveys developments in education since the hardcover edition was published *The Schools We Need* is a passionate and thoughtful book that will appeal to the millions of people who can't understand why America's schools aren't educating our children
