The Letters Of Mercurius:

The Letters of Mercurius Mercurius Oxoniensis, Mercurius, 1970 Who is Mercurius Oxoniensis The first of his brilliantly witty letters mysteriously appeared apparently without the authority of the writer in the Spectator towards the end of 1668 Their candid penetrating and caustic commentary on personalities and events considered by some to verge on indiscretion indicate inside information and sources *The Letters and Speeches of Oliver Cromwell* Oliver Cromwell, 1904 **One Hundred Letters From Hugh Trevor-Roper** Hugh Redwald Trevor-Roper, 2014 A carefully chosen selection from the correspondence of Hugh Trevor Roper one of the most gifted and famous historians of his generation and one of the finest letter writers of the 20th century *Notes and Queries*, 1870 **An Honourable Englishman** Adam Sisman, 2011 Chronicles the life of the acclaimed historian best known for his notorious role in authenticating the forged Hitler Diaries placing his career against a backdrop of the intellectual pressures of his time while offering insight into his acerbic attacks on his colleagues and his highly emotional marriage By the author of *Boswell's Presumptuous Task* *Print Letters in Seventeenth-Century England* Gary Schneider, 2018-02-06 *Print Letters in Seventeenth Century England* investigates how and why letters were printed in the interrelated spheres of political contestation religious controversy and news culture those published as pamphlets as broadsides and in newsbooks in the interests of ideological disputes and as political and religious propaganda The epistolary texts examined in this book be they fictional satirical collected or authentic were written for or framed to have a specific persuasive purpose typically an ideological or propagandistic one This volume offers a unique exploration into the crucial interface of manuscript culture and print culture where tremendous transformations occur when for instance at its most basic level a handwritten letter composed by a single individual and meant for another individual alone comes either intentionally or not into the purview of hundreds or even thousands of people This essential context a solitary exchange transmuted via print into an interaction consumed by many serves to highlight the manner in which letters were exploited as propaganda and operated as vehicles of cultural narrative **Oxford literature, 1450-1640, and 1641-1650. 1912** Falconer Madan, 1912 **The Language of Periodical News in Seventeenth-Century England** Nicholas Brownlee, 2011-05-25 This volume follows the beginnings and development of seventeenth century English periodical print news and sees how contemporary news writers shaped their news discourse over the decades Interdisciplinary in its approach the volume analyses the different strategies employed by news writers of the day as they determined how best to present and write up both foreign and domestic events for a news obsessed English readership In his examination of the language used in corantos newsbooks and gazettes the first forms of periodical news in the English press Nicholas Brownlee provides innovative analyses regarding a rich variety of topics including the role of translation in early periodical news the language of hard news in corantos and news pamphlets forms and styles of epistolary news fluctuating editorial strategies used to address and involve the reader text structure and prototypical headlines English news discourse

within a wider European news context the language of propaganda in the English Civil War periodicity and the reporting of the Tuscan crisis in 1653 the language of Advertisements in The London Gazette the changing fortunes and semantics of News Intelligence and Advice In its focus on how news writers worked and experimented with seventeenth century English language structures and discourse conventions to forge a style of news rhetoric that could inform persuade and even entertain this volume is essential reading for all historians news analysts and historical linguists working in the early modern period **Dictionary of Anonymous and Pseudonymous English Literature: H-L** Samuel Halkett, John Laing, 1928

C.G. Jung Letters, Volume 1 C. G. Jung, 2021-08-10 Beginning with Jung's earliest correspondence to associates of the psychoanalytic period and ending shortly before his death the 935 letters selected for these two volumes offer a running commentary on his creativity The recipients of the letters include Mircea Eliade Sigmund Freud Esther Harding James Joyce Karl Kernyi Erich Neumann Maud Oakes Herbert Read Upton Sinclair and Father Victor White News Networks in Early Modern Europe, 2016-06-27 News Networks in Early Modern Europe attempts to redraw the history of European news communication in the 16th and 17th centuries News is defined partly by movement and circulation yet histories of news have been written overwhelmingly within national contexts This volume of essays explores the notion that early modern European news in all its manifestations manuscript print and oral is fundamentally transnational These 37 essays investigate the language infrastructure and circulation of news across Europe They range from the 15th to the 18th centuries and from the Ottoman Empire to the Americas focussing on the mechanisms of transmission the organisation of networks the spread of forms and modes of news communication and the effects of their translation into new locales and languages Literature and Political Intellection in Early Stuart England Todd Butler, 2019-07-24 Drawing upon a myriad of literary and political texts Literature and Political Intellection in Early Stuart England charts how some of the Stuart period's major challenges to governance the equivocation of recusant Catholics the parsing of one's civil and religious obligations the composition and distribution of subversive texts and the increasing assertiveness of Parliament evoked much greater disputes about the mental processes by which monarchs and subjects alike imagined understood and effected political action Rather than emphasizing particular forms of political thought such as republicanism or absolutism Todd Butler here investigates the more foundational question of political intellection or the various ways that early modern individuals thought through the often uncertain political and religious environment they occupied and how attention to such thinking in oneself or others could itself constitute a political position Focusing on this continuing immanence of cognitive processes in the literature of the Stuart era Butler examines how writers such as Francis Bacon John Donne Philip Massinger John Milton and other less familiar figures of the seventeenth century evidence a shared concern with the interrelationship between mental and political behavior These analyses are combined with similarly close readings of religious and political affairs that similarly return our attention to how early Stuart writers of all sorts understood the relationship between mental states and the forms of political

engagement such as speech oaths debate and letter writing that expressed them What results is a revised framework for early modern political subjectivity one in which claims to liberty and sovereignty are tied not simply to what one can do but how or even if one can freely think *Notes and Queries: A Medium of Inter-Communication for Literary Men, Artists, Antiquaries, Genealogists, Etc* ,1864 **The Freemason's Quarterly Review** ,1834 'To Walk in the Dark' John Ellis,2016-09-02 During the bloody years of the First English Civil War as the battles of Edgehill Newbury and Naseby raged another war was being fought Its combatants fought with cunning and deceit in a hidden conflict that nevertheless would steer the course of history The story of the spies and intelligence gatherers of the Roundheads and Royalists is one that sheds new light on the birth of the Commonwealth In To Walk in the Dark intelligence specialist John Ellis presents the first comprehensive analysis of the First English Civil War intelligence services He details the methods of the Roundhead spies who provided their commanders with a constant flow of information about the movements of the King s armies describes the earliest use of code breaking and mail interception and shows how the Cavalier intelligence forces were overcome He also reveals the intelligence personnel themselves the shadowy spymasters agents and femme fatales The descriptions of how intelligence information was used in the main battles are particularly fascinating and show how intelligence information played a decisive role in determining the outcome of the Civil War itself *Auction catalogues of books* Puttick and Simpson (messrs.),1846 *Dictionary of National Biography* Leslie Stephen,Sir Sidney Lee,1886 **The English Civil War** John Adamson,2008-12-16 John Adamson provides a new synthesis of current research on the political crisis that engulfed England in the 1640s Drawing on new archival findings and challenging current orthodoxies these essays by leading historians offer a variety of original perspectives locating English events firmly within a three kingdoms context **Oxford Books : a Bibliography of Printed Works Relating to the University and City of Oxford, Or Printed Or Published There** Falconer Madan,1912 **The Monthly Magazine** ,1812
