The Lexicon-Encyclopedia Interface Bert Peeters, 2021-10-01 Questions about the exact nature of linguistic as opposed to non linguistic knowledge have been asked for as long as humans have studied language be it as linguists philosophers psychologists language teachers semioticians or cognitive scientists This distinction has been maintained and defended by some attacked and abandoned by others Through specially commissioned papers for this the fifth volume in the Current Research in Semantics Pragmatics Interface series contributors argue both for and against the distinction between lexical knowledge and encyclopedic knowledge and debate how it should be drawn

Interfaces and Interface Conditions Andreas Späth, 2012-02-14 The volume contains articles that focus on the interface between linguistic and conceptual knowledge The issues addressed in the volume include the preconditions of every level of the language system that are required for the transformation of linguistic information into conceptual representations In accordance with Chomsky's Minimalist language model the language system is embedded into the performative systems where language is a part of the cognitive competence of human beings i.e. system of articulation and perception A/P and the conceptual intentional system C/I During the formation

of linguistic structures every performative system obtains well formed representations as its input information The articles of the volume show how interface conditions determine the linguistic representations on each level of the linguistic system Interface conditions result in requirements for the ordering of linguistic elements The syntactic transformation achieves a point where the linguistic structure formation branches to two distinct representational levels Both levels deliver instructions for the systems of performance A P and C I Linearization takes place on the syntactic surface of a sentence The linearization of linguistic elements is manifest at the derivational point of Spell out and also on the level of the phonological form PF This means that on the one hand linearization is relevant to the phonetic aspect of linguistic expressions and on the other hand the interpretation of linguistic utterances is based on hierarchical structures On the level of Logical Form LF all operations apply which don t have any influence on the linear order in overt syntax In addition they affect the generation of hierarchical structures The structure obtained on LF is the representational format of the semantic form of a sentence

Morphology at the Interfaces Jason D. Haugen, 2008-01-21 This monograph addresses

morphology and its interfaces with phonology and syntax by examining comparative data from the Uto Aztecan language family and analyses involving reduplication as well as noun incorporation and related derivational morphology are provided within the framework of Distributed Morphology Reduplication is treated by analyzing reduplicative morphemes reduplicants as morphological pieces Vocabulary Items inserted into syntactic slots at Morphological Structure Noun incorporation constructions are analyzed as involving either incorporation head movement in syntax a la Baker 1988 or conflation involving direct merger of a nominal root into verbal position a la Hale and Keyser 2002 It is argued that denominal verb constructions should be treated as a sub case of NI as in Hale and Keyser 1993 Finally the historical development of the polysynthesis parameter in Nahuatl is discussed and a reconstruction of the likely stages of development each of which is attested elsewhere in the family is presented

Procedural Meaning María Victoria Escandell Vidal, Manuel Leonetti, Aoife Ahern, 2011 This is a collection of edited papers which were presented at the international conference Procedural Meaning It is suitable for those who are interested in or already working on procedural meaning from different points of view and to identify various challenges that can determine the directions for research

A Theory of Conventional Implicature and Pragmatic Markers in Chinese Guangwu Feng, 2010 Conventional implicature is itself a highly controversial term understood very differently by various brands of contemporary pragmatic theory This book sets out to advance a Gricean theoretical framework of conventional implicature It also intends to offer an analysis of pragmatic markers in Chinese

Presuppositions and Discourse Rainer Bäuerle, U. Reyle, Thomas Ede Zimmermann, 2010 Undoubtedly presupposition theory is a major chapter in the success story of dynamic semantics This book features papers on this topic based on a conference on Presupposition convened in Stuttgart in October 2000

Multidimensional Semantics of Evaluative Adverbs Mingya Liu, 2012-11-21 Suitable for linguists and philosophers of language this book provides a multidimensional analysis for the lexical semantics of evaluative adverbs nonfactive evaluative adverbs trigger a conventional implicature whereas factive evaluative adverbs not only trigger a conventional implicature but also a conventional presupposition

Making Semantics Pragmatic Ken Turner, 2011-06-08 This collection of especially invited papers aims to explore the nature of the semantics pragmatics interface by examining the extent to which the analysis of certain expressions or constructions can be pragmaticised As the title of the collection implicates it is anticipated that the theoretical and descriptive burden will move from semantics to pragmatics However not all parts of a linguistic system will yield to a pragmatic treatment The possibility remains that certain expressions or constructions are more economically and elegantly treated in semantic terms Thus this collection also contains papers that address the topic of making pragmatics semantic This collection contributes to the current interest in examining the division of labour between semantics and pragmatics in the analysis of meaning All of the papers are at the forefront of knowledge in these matters and each contains original empirical analyses and or novel theoretical perspectives This book is relevant to courses in university departments of linguistics modern languages

philosophy and psychology and to a wide range of university teaching and research

Categorization and Category

Change Gianina Iordăchioaia, Isabelle Roy, Kaori Takamine, 2014-07-08 This collection of selected papers addresses theoretical and empirical issues related to lexical categories categorization and category change Any grammatical description makes use of parts of speech The proper set of lexical categories and the definitions of their properties cross linguistically has been a remnant issue in linguistics since the beginnings of grammatical description Besides the traditional classification of lexical classes with their morphological syntactic and or interpretational properties has led to the emergence of mixed categories which are problematic in linguistic theory since the current systems either feature based or syntactic have no means to express fuzziness This volume addresses both these issues in two thematic parts The first part Categories and categorization consists of papers that tackle the problem of defining categories and mixed categories and its reflex on the inventory The second part Issues in category change comprises investigations on category change focusing on nominalizations which is the test ground for a theory of category change and word formation The papers included in this part discuss among others the similarities and mismatches between derived nominals and the corresponding verbs in terms of argument realization and eventive interpretation The languages investigated in the volume include English French German Greek Japanese Romanian Russian Spanish and Swedish This book targets researchers and advanced students in theoretical linguistics

Numerous Meanings Bert Bultinck, 2021-10-25 Outlandish as it may seem to the uninitiated the meaning of English cardinal numbers has been the object of many heated and fascinating debates Notwithstanding the numerous important objections that have been formulated in the last three decades the neo Gricean scalar account is still the standard semantic description of numerals In this book Bultinck writes the history of this implicature driven approach and demonstrates that it suffers from methodological insecurity and postulates highly non conventional meanings of numerals as their literal meaning while it confuses the level of lexical semantics with that of utterances and cannot deal with a large number of counter examples Relying on the results of an extensive corpus based analysis an alternative account of the meaning of English cardinals and the ways in which their interpretation is influenced by other linguistic elements is presented As such this analysis constitutes a prism that offers today's linguist an iridescent history of one of the most fascinating if often misconstrued topics in contemporary meaning research the conversational implicatures

Within Language, Beyond Theories (Volume I) Anna Bondaruk, Anna Prazmowska, 2015-06-18 This is the first volume in a series of three books called Within Language Beyond Theories which focuses on current linguistic research surpassing the limits of contemporary theoretical frameworks in order to gain new insights into the structure of the language system and to offer more explanatorily adequate accounts of linguistic phenomena from a number of the world's languages This volume brings together twenty five papers pertaining to theoretical linguistics and consists of three parts

Causatives in Minimalism

Mercedes Tubino Blanco, 2011 This monograph studies issues of current minimalist concern such as whether differences in

the expression of argument and syntactic structure can all be attributed to the parameterization of specific functional heads. In particular, this book studies in depth the extent to which variation in the expression of causation available both intra and crosslinguistically can be accounted for by appealing only to the microparameterization of the causative head Cause as previously argued for by linguists such as Pytkkanen. It concludes that the microparameterization of Cause may explain some major characteristics associated with causatives but it cannot be regarded as the only explanation behind variation in these structures. The book includes relevant discussion on argument structure and looks in detail at languages such as the Uto Aztecan Hiaki that have not received much attention before. It is mostly intended for an audience interested in theoretical approaches to argument structure and variation.

Morphological Metatheory Daniel Siddiqi, Heidi Harley, 2016-06-29 The field of morphology is particularly heterogeneous. Investigators differ on key points at every level of theory. These divisions are not minor issues about technical implementation but rather are foundational issues that mold the underlying anatomy of any theory. The field has developed very rapidly both theoretically and methodologically giving rise to many competing theories and varied hypotheses. Many drastically different and often contradictory models and foundational hypotheses have been proposed. Theories diverge with respect to everything from foundational architectural assumptions to the specific combinatorial mechanisms used to derive complex words. Today these distinct models of word formation largely exist in parallel mostly without proponents confronting or discussing these differences in any major forum. After forty years of fast paced growth in the field, morphologists are in need of a moment to take a breath and survey the drastically different points of view within the field. This volume provides such a moment.

Semantics - Noun Phrases and Verb Phrases Paul Portner, Klaus Heusinger, Claudia Maienborn, 2019-02-19 Gain a deeper understanding of essential research on the semantics of noun phrases and verb phrases. Clear explanations of significant recent research bring complex issues to life with expert guidance on topics of debate within the field. The book gives readers valuable insights into topics such as definiteness, specificity, genericity, aspect, aktionsart, and mood. It also discusses directions for future research. Written by a world class team of authors, these highly cited articles are here in paperback for the first time since their original publication. An essential reference for researchers in the area.

New Impulses in Word-Formation Susan Olsen, 2016-10-31 This special issue entitled New Impulses in Word Formation demonstrates in thirteen individual empirically oriented case studies how the methods gleaned from newer theoretical models, optimality theory, construction grammar, cognitive grammar, distributive morphology, parallel architecture, as well as from the linguistic sub disciplines of psycholinguistics, neurolinguistics, corpus linguistics, and computational linguistics, can be applied lucratively to the field of word formation. The individual contributions are from a team of international linguists and deal with a broad spectrum of interests divided almost equally between the two major areas of word formation: derivation and composition.

Cognition and Technology Barbara Gorayska, Jacob L. Mey, 2004-10-28 This new collection of contributions to the field of Cognitive Technology (CT) provides the to date widest

spectrum of the state of the art in the discipline a discipline dedicated to humane factors in tool design The reader will find here a summary of past research as well as an overview of new areas for future investigations The collection contains an extensive CT agenda identifying many as yet unsolved CT related design issues An exciting new development is the concept of natural technology Some examples of natural technologies are discussed and the merits of empirical investigations into what they are and how they develop of interest to cognitive scientists and designers of new corrective digital technologies are pointed out Another distinctive feature of the collection is that it provides examples of scientists tools important too is its emphasis on ethics in tool design The collection ends with a provocative coda any responses can appear in the new annual CT forum of the Pragmatics and Cognition journal The collection will appeal to all scientists humanists and professionals interested in the interface between human cognitive processes and the technologies that augment them *Language Networks* Richard A. Hudson, Richard Hudson, 2007 *Networks of Language* will interest all those concerned with the acquisition and everyday operations of language in particular scholars and advanced students in linguistics psychology and cognitive **Word Grammar** Kensei Sugayama, Richard A. Hudson, 2005-12-15 This book is an introduction to Word Grammar a theory of language structure founded and developed by Dick Hudson In this theory language is a cognitive network a network of concepts words and meanings containing all the elements of a linguistic analysis The theory of language is therefore embedded in a theory of knowledge in which there are no boundaries between one form of knowledge and any other The most controversial idea in Word Grammar syntax is that phrase structure is redundant because all its work can be done by means of dependencies between individual words Word word dependency is therefore a key concept in Word Grammar and the syntax and semantics of a sentence is built upon this foundation Contributors to this volume are primarily Word Grammar grammarians from across the world All the chapters here manifest theoretical potentialities of Word Grammar exploring how powerful Word Grammar is to offer analysis for linguistic phenomena in various languages The chapters come from varying perspectives and include work on a number of languages including English German Japanese Swahili Turkish and Ancient Greek Phenomena studied include verbal inflection case agreement extraction construction and code mixing This collection will be of interest to academics encountering Word Grammar for the first time or for those who are already familiar with this theory and are interested in reading how it has evolved and what its future may hold
