range of players intermediate through master strength and beyond *My Best Games of Chess 1905-1954* Savielly Tartakower, 2015-01-30 The Unique Genius of Tartakower One of the most creative grandmasters ever to play the Royal Game was Savielly Tartakower His combination of bold play and fascinating writing has long endeared him to chess aficionados worldwide His classic work of best games has never been available in English algebraic notation Until now Tartakower's annotations are unlike any other master of his time He repeatedly stressed the psychological nature of chess for example Another Tartakowerism is An attack is against a castled position weak pawns and most of all against the mind of the opponent What he reserves for a footnote like what conditions are present to make a game a work of art other authors would need pages to articulate if they addressed the matters at all This book was meant to do what all great annotations do instruct explain and entertain And it succeeds spectacularly Andy Soltis in his Foreword Experience the unique genius of Savielly Tartakower in this 21st Century Edition of his games collection 201 games 49 game fragments all deeply annotated and quintessentially Tartakower *My Best Games of Chess* Alexander Alekhine, 2013-04-17 The Genius of Alekhine In chess literature there have only been a very few chess books that have immediately and permanently established themselves as classics Lasker's Manual of Chess by Emanuel Lasker Masters of the Chessboard by Richard Reti and Dvoretsky's Endgame Manual by Mark Dvoretsky are three that come to mind There are of course others among them My Best Games of Chess 1908-1937 by the fourth world chess champion Alexander Alekhine The original English edition published three quarters of a century ago used English descriptive notation contained one photograph no crosstables and was released in two separate volumes This new 21st century edition presented with modern algebraic notation has combined both books into a single volume added more than three dozen archival photographs crosstables Alekhine's complete match and tournament records a foreword by Russian grandmaster Igor Zaitsev as well as many more diagrams A comprehensive computer assisted analytical supplement has also been prepared and is available for download at no extra charge so that if you wish you may compare Alekhine's impressive notes with the preferences of the silicon monster Whether you feel as if you are revisiting an old friend or being introduced to this splendid game collection for the first time you will marvel at how Alekhine's games and works remain in many respects extraordinarily consonant with the modern approach And you will not fail to be impressed by the genuine genius that is Alekhine *Miniatures in the Sicilian Najdorf* Carsten Hansen, 2016-06-13 INSTRUCTIVE NAJDORF MINIATURES An opening book based only on miniatures Perhaps it sounds odd at first but it works well in the sharp Najdorf and even in the more positional Queen's Indian Defense As usual Carsten's theoretical coverage is thorough and the books are not repertoire based but gives a full examination of these topical openings Is it limiting only to show miniatures Maybe but one somehow get the purified version of a successful strategy when the games are not complex battles but a slam dunk Grandmaster Peter Heine Nielsen Coach Second to World Champion Magnus Carlsen The purpose of the book is to entertain and educate you The entertainment consists of 100 main games all of which are 25 moves or less In

addition to the main games you will find miniatures included in the notes along with many other complete games The education part involves solving tactical puzzles reasoning your way to the right move spotting combinations and studying the theory associated with these lines While the theoretical coverage may not necessarily be as deep as in opening monographs or repertoire books there s usually more than enough to give you a good understanding of the particular line making it easier for you to incorporate it into your opening repertoire We have also tried to include some key alternatives with analysis to give you an idea of other possibilities for both sides As for the games they are typically between players with a rating of at least 2350 and in fact are often stronger However we have made some exceptions to this guiding principle when a lower rated player beats a player rated above the magical 2350 number So that the performances of the players may be evaluated better their ELO ratings have been included The subject of this book is the Najdorf Sicilian which arises after 1 e4 c5 2 Nf3 d6 3 d4 cxd4 4 Nxd4 Nf6 5 Nc3 a6 The Najdorf has been and continues to be a tremendously popular opening at all levels It is sharp unbalanced with many theory laden lines and fun The main lines after 6 Bg5 e6 7 f4 are steeped in theory making them tricky to play especially for players with limited time to study
